HALAT GROUP

CONSTRUCTION SOLUTIONS

SINCE 2002

COMPANY PROFILE

With over two decades of experience in diverse sectors, HALAT GROUP stands out as a market leader in the construction and luxury interior solutions industry. Founded 2002 by Halat Rauf Aziz, an industry pioneer, we are at the forefront of innovation.

Our dynamic approach and keen awareness of societal changes have facilitated our regional expansion into various provinces, allowing us to offer luxury products that align with eco-friendly practices. We have built a strong reputation for delivering high-quality, sustainable solutions. In addition to our expertise in luxury products and sustainable solutions, HALAT GROUP is actively engaged in the construction of a diverse range of projects.

HALAT GROUP dedicated team manages every aspect of construction, ensuring that we deliver high-quality results on time and within budget. By leveraging our extensive industry experience and innovative techniques, we are committed to transforming visions into reality, whether for residential, commercial, or industrial developments.

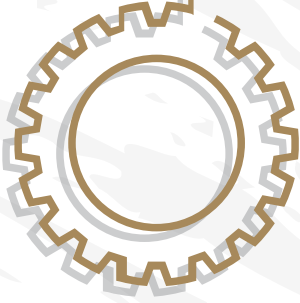

Our holistic approach enables us to integrate advanced design principles with sustainable practices, solidifying our reputation as a comprehensive solution provider in the construction sector.

HALAT GROUP EXPERTISE

- Comprehensive Construction Solutions
- Interior & Exterior Design
- Kitchen Counter-tops
- Home and Office Furniture
- Faucet
- Sanitary Ware (Smart Technology)

We have successfully introduced sustainable international brands to the region, promoting a "purest hygiene lifestyle."

OUR WORK PROCESS

At Halat Group, we take pride in the extensive knowledge, skills, and expertise of our team members, who collaborate effectively to deliver successful projects. Recognizing the importance of strong relationships, we adopt a collaborative approach that is both flexible and responsive to our clients' needs. This commitment to teamwork and adaptability ensures that we consistently meet and exceed expectations.

HALAT GROUP

CONSTRUCTION SOLUTIONS

SINCE 2002

HOW IT ALL BEGAN

The journey of Halat Group began with Halat Rauf Aziz's deep interest and commitment to environmental protection and sustainability in the construction and finishing from the beginning to the very detailed end. This passion has evolved into a successful group of companies that play a pivotal role in advancing environmentally friendly and resource-efficient practices in the market. Our dedication to sustainability continues to drive our growth and influence in the industry.

DEEP RESEARCH

Our team comprises a diverse group of professionals from various backgrounds and ethnicities, collaboratively working on optimally designed tasks and processes that enhance performance. This diversity fosters creativity and innovation in our approach to challenges.

TEAMWORK

HALAT GROUP team excels at tackling complex and significant problems, often delivering superior results through ambitious projects. By leveraging complementary expertise and applying diverse research methodologies, we achieve outcomes that exceed expectations.

PROBLEM SOLVING

Our problem-solving approach emphasizes critical thinking and collaborative efforts, enabling us to address challenges effectively. Working as a team enhances our ability to arrive at the most effective solutions, particularly in the realm of construction.

CONSTRUCTION SOLUTIONS

Our problem-solving approach emphasizes critical thinking and collaborative efforts, enabling us to address challenges effectively. Working as a team enhances our ability to arrive at the most effective solutions, particularly in the realm of construction.

In 2002 Mr. Rauf established Halat Group for General Trading and Construction in Iraq, where he oversaw the development of Shifa Hospital in Erbil, a well-respected healthcare facility. 2005, he further expanded the group's portfolio by investing in Spark, the exclusive dealer of Vitra in Iraq, which has since become a leading supplier of sanitary ware and interior products. Spark also became the official distributor of Vovo, which is an important turning point in the group's growth. 2010, he became the exclusive dealer for Villeroy & Boch in the region.

HALAT GROUP

CONSTRUCTION SOLUTIONS

SINCE 2002

In 2015, he launched Green Design, securing exclusive dealerships for Enza Home and Yatas bedding in Iraq. His most recent venture is Delos International, which encompasses brands like Cucine Lube, offering comprehensive solutions from design to construction and furnishing, with a focus on high-end Italian brands. Delos International has successfully completed numerous turnkey projects across various regions of Iraq. The group's primary objective is to provide cutting-edge products that align with modern lifestyles, ensuring high quality and compliance with international standards.

CAVALLI TOWER

EXTERIOR FACADE

Cavalli tower presents a bold exterior facade finished with gardena tixe, a super washable water-based paint from the italian manufacturer tixe. The coating delivers high coverage, strong opacity, and excellent resistance to dirt, weather, and mechanical wear, making it ideal for tall, exposed surfaces in erbil's demanding climate. Applied in multiple coats over a properly prepared substrate, gardena creates a smooth, uniform finish that accentuates the building's clean architectural lines while simplifying long-term maintenance. The facade remains visually crisp and technically resilient over time, reinforcing cavalli tower's identity as a landmark of modern design and durable, high-performance finishes in the city's skyline.

GARDENA

SUPER WASHABLE
WALL PAINT

super washable water-based paint for indoor and outdoor use, easy to apply. it has excellent coverage both dry and wet and excellent expansion. it combines decoration, elegance, and perfection of result. suitable for all walls in public or domestic environments, with a tendency to contact and so particularly dirty.

CAVALLI TOWER INTERIORS

In the interior spaces of cavalli tower, the ceilings were finished with tixemat by tixe, a high performance water-based filling paint designed for smooth, uniform coverage over plasterboards and repaired areas. The product delivers very high opacity and excellent filling power, creating a flawless ceiling surface with minimal coats and without the need for additional primers on low absorbent substrates. Its smooth, matte finish evenly diffuses light, enhancing the sense of space and contributing to the project's clean, modern aesthetic. Tixemat remains highly washable and durable, making ceilings in residential and hospitality areas easy to maintain while preserving a refined, seamless appearance over time.

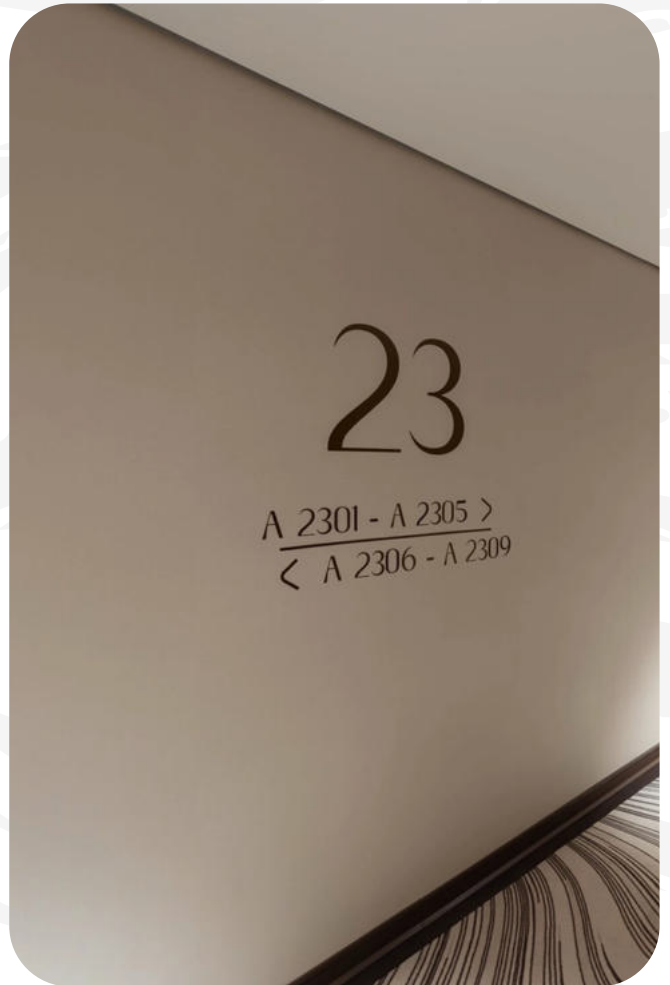

TIXEMAT

SUPER-OPAQUE
FILLING PAINT

super-washable white water-based wall paint with very high coverage, opacity, and filling power. used for particularly patched and uneven wall substrates (such as plasterboard, prefabricated panels, and plaster) on which the application of several coats is to be avoided, thus speeding up painting operations with a single coat.

CAVALLI TOWER RECEPTION

in the reception and lobby areas of cavalli tower, intonatix by tixe was applied to create a refined, subtly textured wall finish that enhances light diffusion and spatial depth. this decorative, water-based coating offers high coverage, excellent adhesion, and a uniform matte appearance across large interior surfaces. its gentle texture softens reflections and adds a tactile quality to the walls, while remaining durable enough to withstand the activity of a high-traffic hospitality environment. the finish integrates seamlessly with the tower's modern materials and lighting concept, giving the entrance zone a cohesive, sophisticated character that reinforces cavalli tower's identity as a landmark of elegant and technically advanced design.

INTONATIX

ACRYL-SILOXANE
COATING

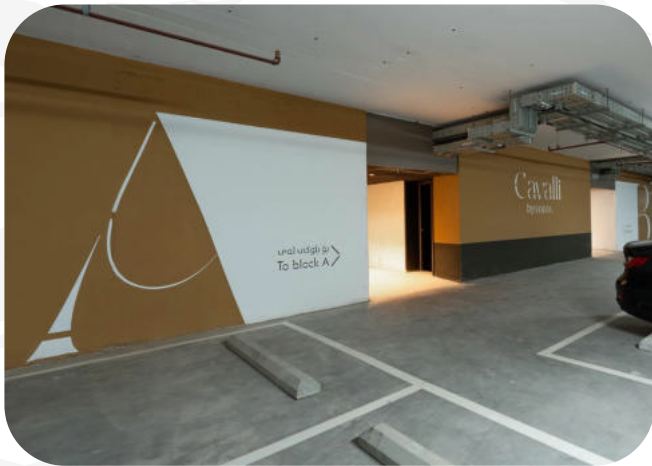

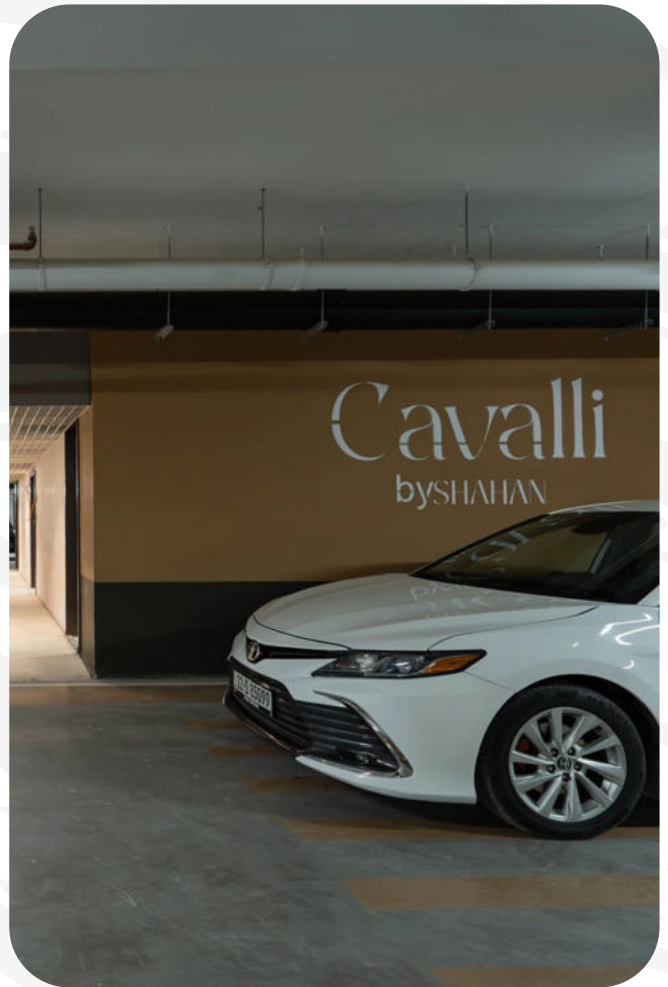

thick acrylic coating with 1.2 calibrated aggregates, intended for internal and external wall use. it has high resistance to alkalis, humidity, and solar radiation and excellent adhesion to the most varied types of support: minerals, artificial and natural stones, lime plasters, cement, gypsum, plasterboard, fired bricks, old acrylic, vinyl, siloxane and silicate.

CAVALLI TOWER

GARAGE

The garage at cavalli tower combines functionality and visual clarity through a carefully chosen set of finishes. Walls are coated with opacum by tixe, a super matte water-based paint that delivers deep opacity, uniform coverage, and a clean, non reflective surface ideal for underground parking environments. Metal elements such as doors, grilles, and structural details are finished with brilltix, a high-gloss protective coating that resists wear, moisture, and mechanical impact while emphasizing architectural lines. The floor uses rob road marking by robson paints, a specialized marking system that ensures clear, durable lane demarcations, signage, and parking guidance. Together, these products create a safe, organized, and visually coherent garage that aligns with the building's high end technical and aesthetic standards.

OPACUM

SUPER MATT
DECORATIVE ENAMEL

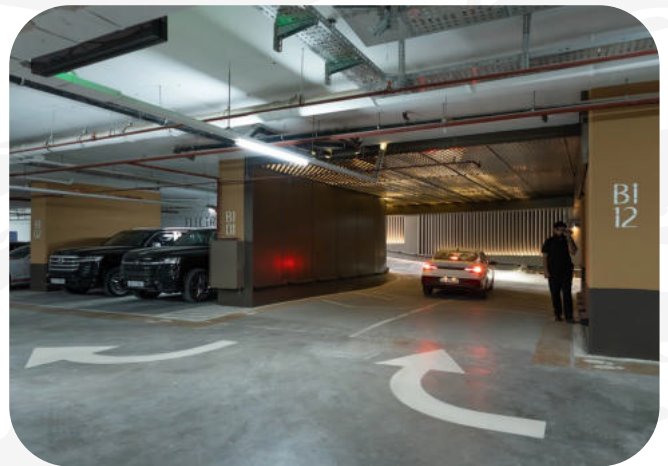

decorative water-based enamel for interiors with high opacity and highly cleanable. it gives a uniform and elegant appearance, but at the same time excellent washability and cleaning capability.

BRILLTIX

SPECIAL ANTICORROSIVE ENAMEL

the shiny enamel is used both indoors and outdoors, on iron and wood, characterized by high elasticity and high strength even under difficult conditions, such as urban environments and close to the sea, where smog, wear, and corrosion are particularly aggressive. for these reasons it can be used on wooden ships and iron.

ROBSON

ROB ACRYLIC ROAD MARKING

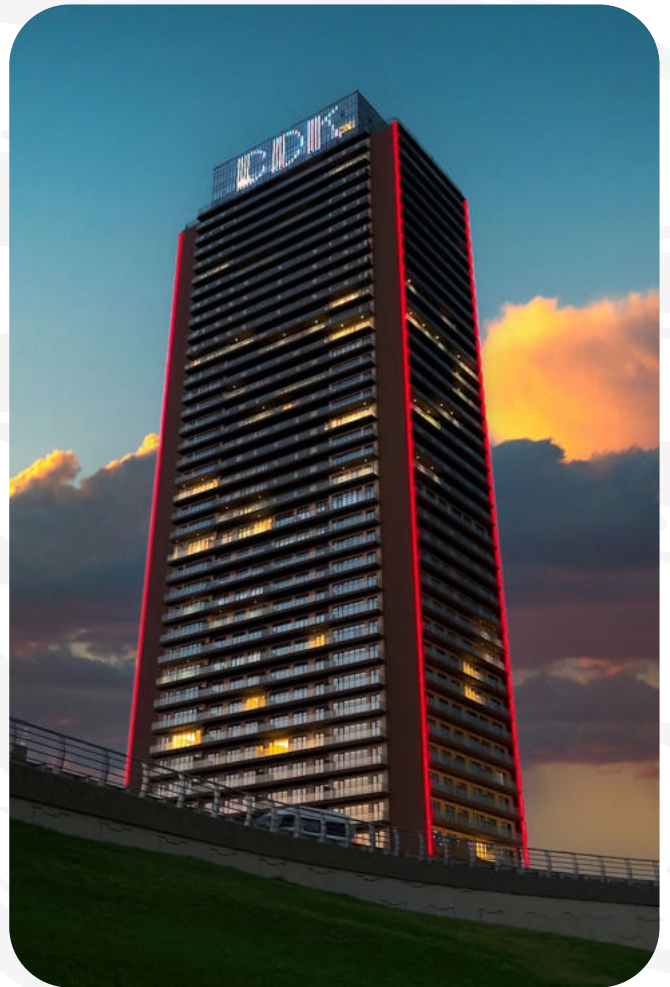

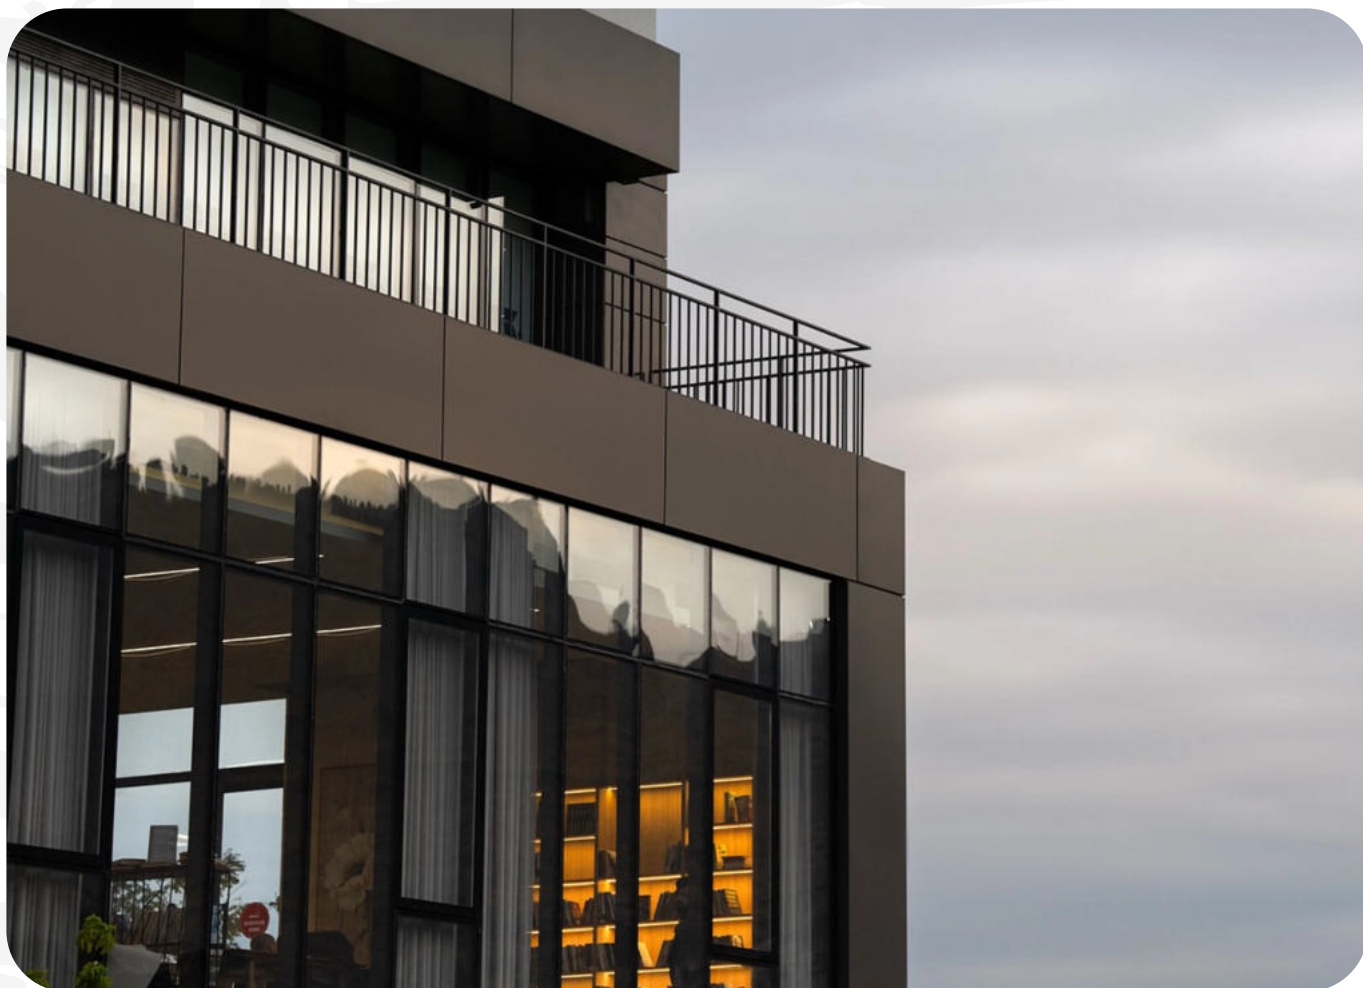

a road marking paint based on acrylic resin, pigmented with light fast weather resistant pigment with inert extenders. it is fast drying coating, suitable on asphalt. good resistance to water, oils, and gasoline. good mechanical and abrasion resistant road marking paint. mainly useful for marking roadways, curbstone, traffic crossings, service stations, and parking lots.

SHAHAN TOWER

EXTERIOR FACADE

Shahan tower in duhok presents a distinctive exterior facade that has become an iconic element of the city's skyline, reflecting a modern architectural vision for luxury living in kurdistan. The building's outer surfaces are finished with gardena, a super washable water-based paint by tixe, chosen for its high coverage, strong opacity, and resistance to weather, dirt, and frequent contact. Applied over a well prepared substrate, gardena delivers a smooth, uniform appearance that enhances the tower's clean lines and glossy glazing while ensuring long term durability. The result is an elegant, resilient facade that maintains its visual quality in duhok's climate, reinforcing shahan tower's status as a benchmark for high rise residential design in the region.

GARDENA

SUPER WASHABLE
WALL PAINT

super washable water-based paint for indoor and outdoor use, easy to apply. It has excellent coverage both dry and wet and excellent expansion. It combines decoration, elegance, and perfection of result. Suitable for all walls in public or domestic environments, with a tendency to contact and so particularly dirty.

SHAHAN TOWER INTERIORS

In the interior spaces of shahan tower, tixemat by tixe was applied to create a smooth, uniform base over plasterboards and repaired wall surfaces. This water-based filling paint offers very high coverage and excellent film opacity, allowing a clean, neutral background with minimal coats and reduced need for additional primers on low absorbent substrates. Its smooth matte finish helps diffuse light softly, enhancing the sense of space and contributing to the project's calm, modern interior atmosphere. Tixemat is also highly washable, making walls in residential and common areas easy to maintain over time while preserving a refined, seamless appearance that supports shahan tower's high end interior identity.

TIXEMAT

SUPER-OPAQUE
FILLING PAINT

super-washable white water-based wall paint with very high coverage, opacity, and filling power. used for particularly patched and uneven wall substrates (such as plasterboard, prefabricated panels, and plaster) on which the application of several coats is to be avoided, thus speeding up painting operations with a single coat.

SHAHAN TOWER CORRIDORS

In the circulation corridors of shahan tower, tixemat by tixe was selected to provide a smooth, uniform finish over plasterboard and repaired surfaces in high traffic areas. The water-based filling paint delivers very high coverage and strong opacity, creating a clean, neutral background that enhances the perception of length and clarity in narrow circulation spaces. Its smooth matte surface minimizes glare and helps maintain a calm, consistent visual rhythm along the corridors while remaining highly washable and durable. Tixemat supports the building's modern interior language, ensuring that the circulation zones remain visually cohesive, easy to maintain, and aligned with the premium residential character of shahan tower.

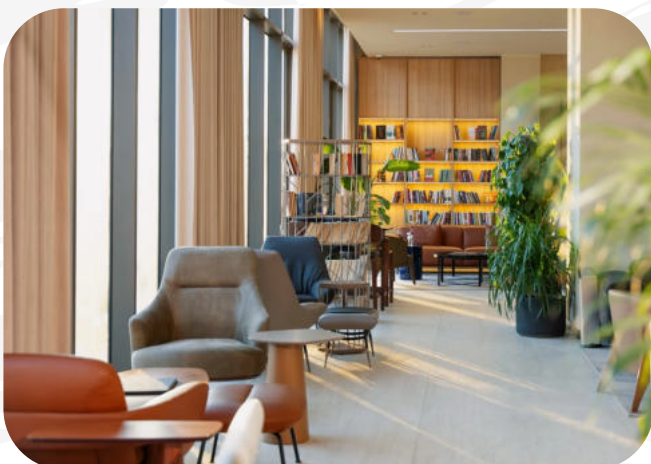

TIXEMAT

SUPER-OPAQUE
FILLING PAINT

super-washable white water-based wall paint with very high coverage, opacity, and filling power. used for particularly patched and uneven wall substrates (such as plasterboard, prefabricated panels, and plaster) on which the application of several coats is to be avoided, thus speeding up painting operations with a single coat.

SHAHAN TOWER RECEPTION

In the reception area of shahan tower, the ceiling was finished with tixemat by tixe, a high performance water-based filling paint designed to create a smooth, uniform surface over plasterboard and repaired sections. The product offers very high coverage and excellent opacity, allowing a clean, seamless appearance with minimal coats and no need for additional primers on low absorbent substrates. Its smooth matte finish helps diffuse light evenly, enhancing the sense of space and contributing to the reception's bright, welcoming atmosphere. Tixemat remains highly washable and durable, ensuring that the ceiling stays visually crisp over time while supporting the tower's refined, modern interior identity.

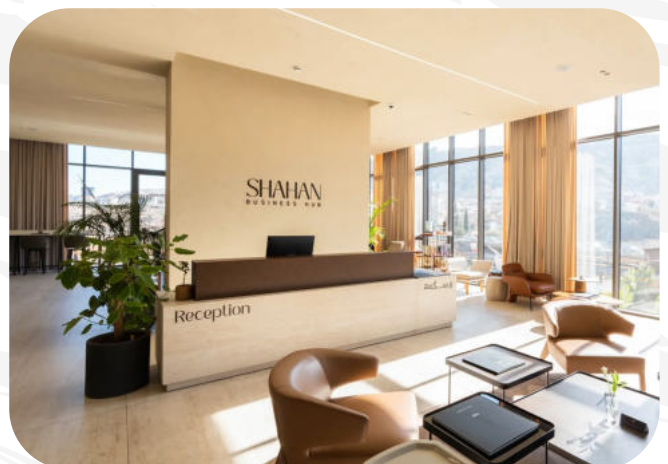

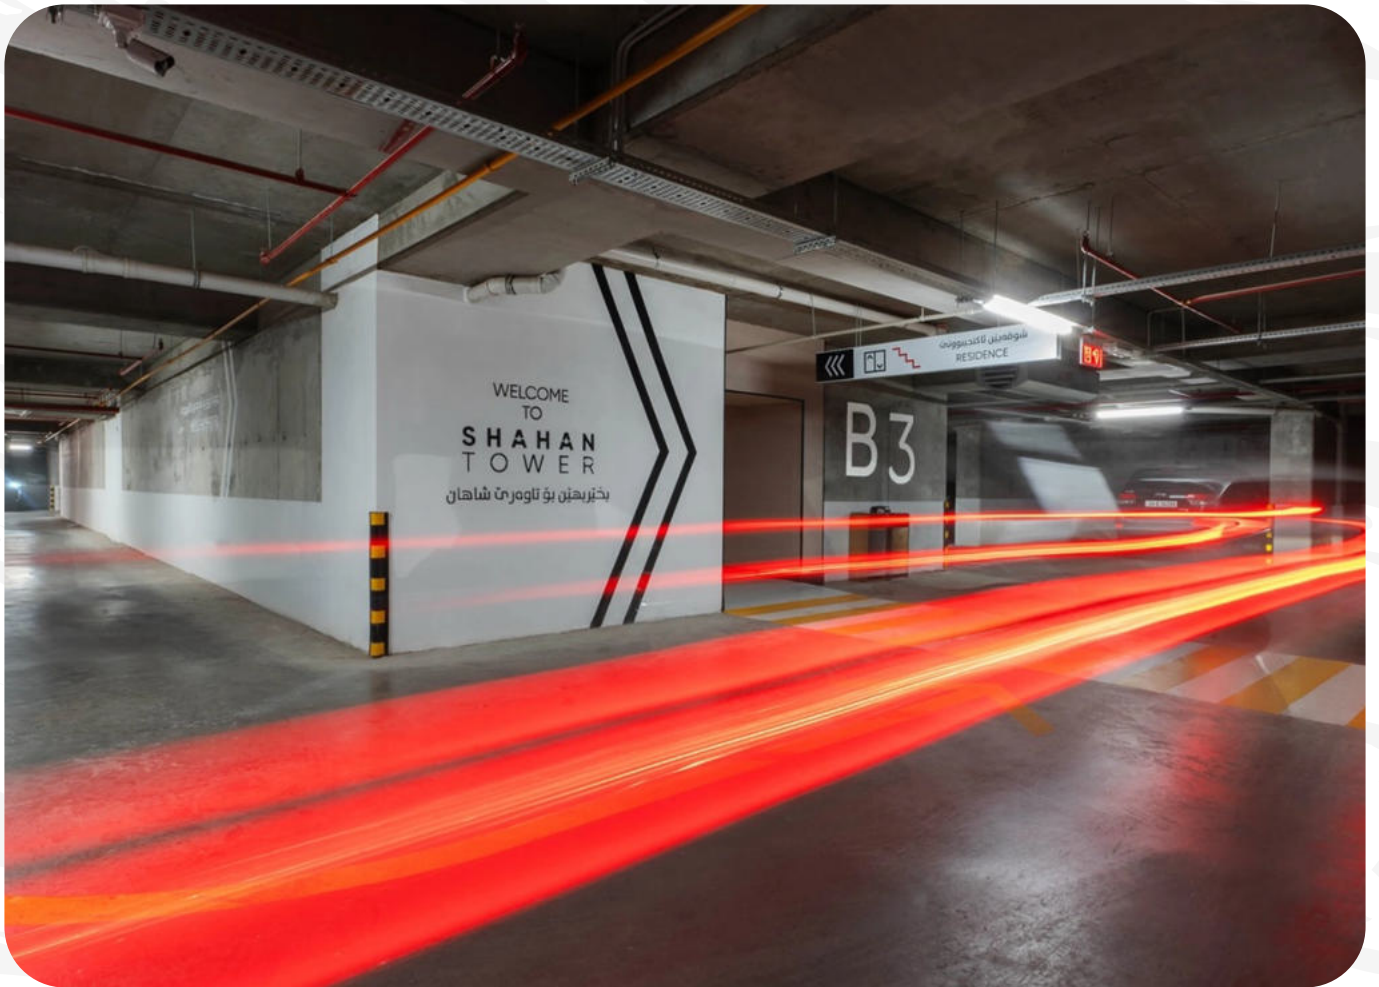

TIXEMAT

SUPER-OPAQUE
FILLING PAINT

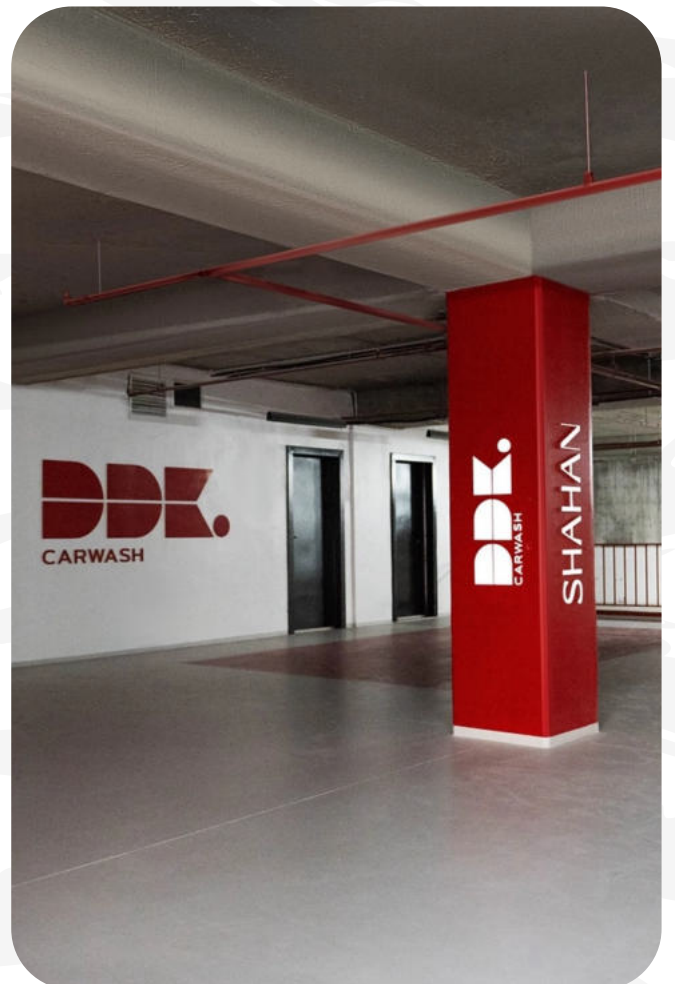

super-washable white water-based wall paint with very high coverage, opacity, and filling power, used for particularly patched and uneven wall substrates (such as plasterboard, prefabricated panels, and plaster) on which the application of several coats is to be avoided, thus speeding up painting operations with a single coat.

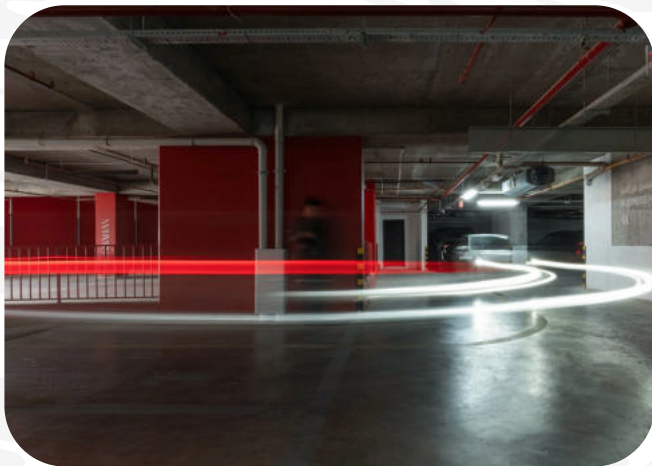

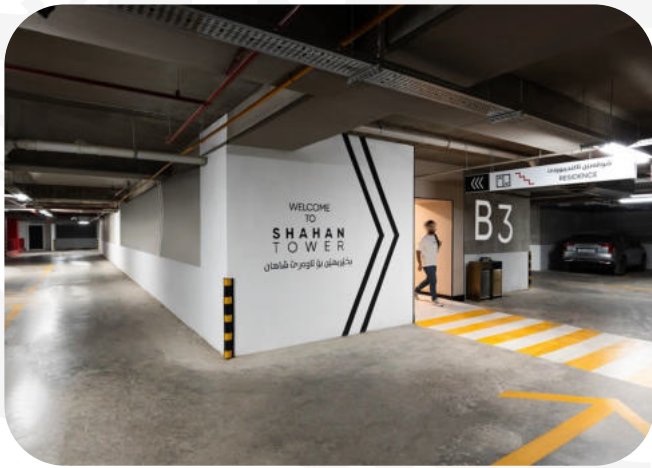

SHAHAN TOWER GARAGE

The garage at shahan tower uses opacum by tixe on the walls to create a super matte, highly opaque finish that reduces glare and provides a clean, uniform background suitable for underground parking environments. The smooth, non reflective coating enhances legibility of signage and lane markings while remaining durable and easy to maintain in high humidity conditions. The floor is marked with rob road marking by robson paints, a specialized road marking system that delivers clear, long lasting lane demarcations, parking guidance, and directional symbols. Together, opacum and rob road marking ensure the garage is safe, organized, and visually coherent, aligning with the building's technical quality and modern architectural language.

OPACUM

SUPER MATT
DECORATIVE ENAMEL

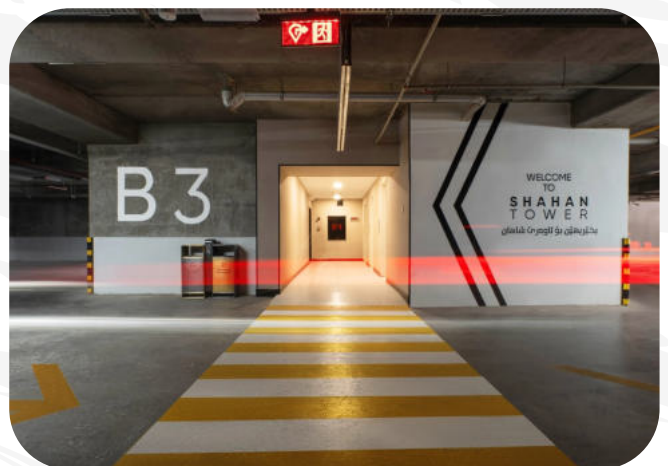

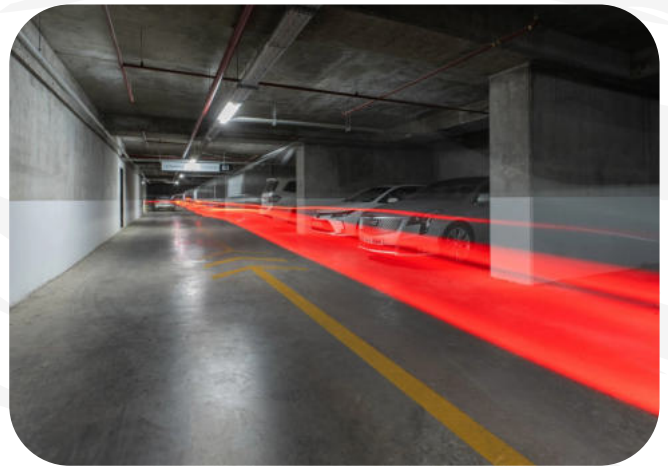

decorative water-based enamel for interiors with high opacity and highly cleanable. it gives a uniform and elegant appearance, but at the same time excellent washability and cleaning capability.

ROBSON

ROB ACRYLIC
ROAD MARKING

a road marking paint based on acrylic resin, pigmented with light fast weather resistant pigment with inert extenders. it is fast drying coating, suitable on asphalt. good resistance to water, oils, and gasoline. good mechanical and abrasion resistant road marking paint. mainly useful for marking roadways, curbstone, traffic crossings, service stations, and parking lots.

SHAHAN TOWER

GYM

In the gym area of shahan tower, tixemat by tixe was applied to create a smooth, uniform finish over plasterboard and repaired wall surfaces in a high use, active environment. The water-based filling paint delivers very high coverage and strong opacity, producing a clean, neutral background that enhances the perception of space and supports the room's bright, energetic atmosphere. Its smooth matte surface minimizes glare from lighting and equipment reflections, contributing to a focused and comfortable workout experience. Tixemat is also highly washable and durable, ensuring that walls remain visually fresh and easy to maintain despite frequent use, sweat exposure, and cleaning, while reinforcing the gym's modern, high quality interior identity.

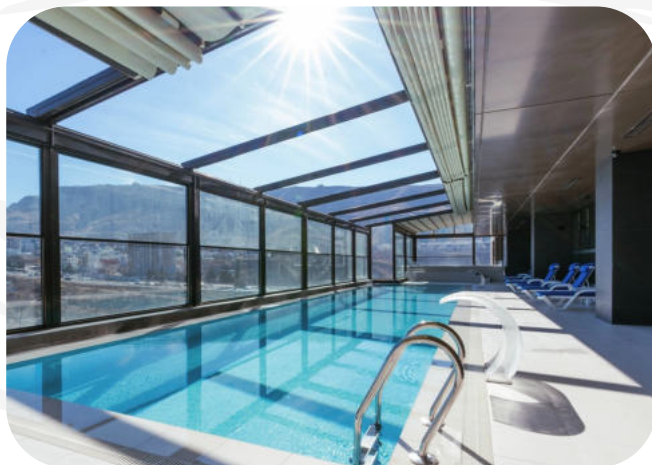

TIXEMAT

SUPER-OPAQUE
FILLING PAINT

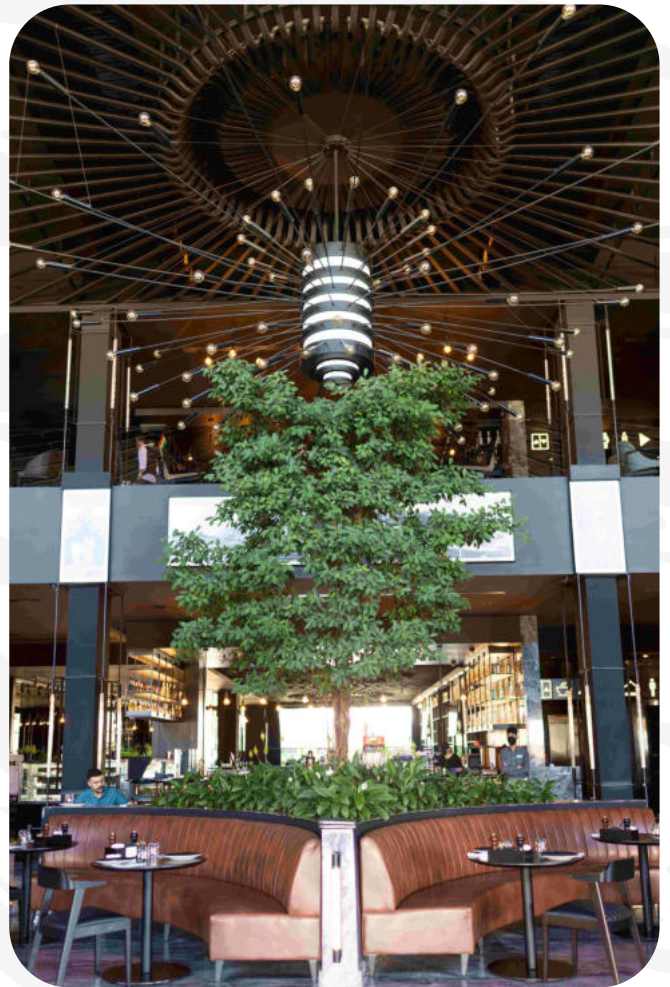

super-washable white water-based wall paint with very high coverage, opacity, and filling power, used for particularly patched and uneven wall substrates (such as plasterboard, prefabricated panels, and plaster) on which the application of several coats is to be avoided, thus speeding up painting operations with a single coat.

SHAHAN TOWER RESTAURANT

In the restaurant of shahan tower, tiberius by tixe was used to create a refined, decorative wall finish that enhances the space's warmth and character. The product is a water-based decorative paint designed to deliver a soft, textured appearance with excellent coverage and strong adhesion on properly prepared surfaces. Its subtle texture interacts gently with lighting, adding depth and visual interest to the dining environment without overwhelming the furniture and decor. Tiberius remains durable and easy to maintain, making it suitable for a busy hospitality setting where walls are exposed to frequent use and cleaning. The finish supports the restaurant's inviting, modern ambiance, reinforcing shahan tower's commitment to high quality interior detailing.

TIBERIUS

TRAVERTINE EFFECT
WALL COVERING

a highly breathable interior wall covering, recreates the finish of travertine stone with the classic porous, striped appearance used in ancient rome. the simplicity and versatility of tiberius allow for a variety of decorative finishes, including travertine, concrete, plaster, scratched, relief, textured, and split stone effects.

SHAHAN TOWER MARKET

In the market area of shahan tower, royal paint was applied to create a clean, durable finish suited to a high traffic retail environment. The coating offers good coverage and opacity, producing a uniform background that enhances visibility of signage, displays, and product arrangements. Its smooth, easy to clean surface helps maintain hygiene and visual clarity in a busy shopping zone where walls are frequently touched and cleaned. Royal paint supports the project's modern interior character while ensuring long term resilience against wear and daily use. The result is a bright, organized market space that aligns with shahan tower's overall emphasis on quality finishes and functional design.

ROYAL PAINT

SUPER WASHABLE
WALL ENAMEL

stain super-washable enamel for interiors, suitable for the protection and decoration of all new or previously painted wall surfaces with high passage. easy to apply, it has excellent coverage both dry and wet and excellent washability and stain removal. it combines decoration, elegance, and perfection of result.

SHAHAN TOWER KINDERGARTEN

In the kindergarten area of shahan tower, interior paints by tixe were applied to create a safe, welcoming, and visually stimulating environment for children. The walls feature smooth, matte finishes in soft, bright colors that enhance natural and artificial light while reducing glare and reflections. The coatings are easy to clean and resistant to frequent wiping, making them suitable for a space where walls are regularly touched, drawn on, and sanitized. The result is a cheerful, hygienic interior that supports learning and play, reflecting shahan tower's commitment to high quality, childfriendly design in its community spaces.

SHAHAN TOWER

LIBRARY

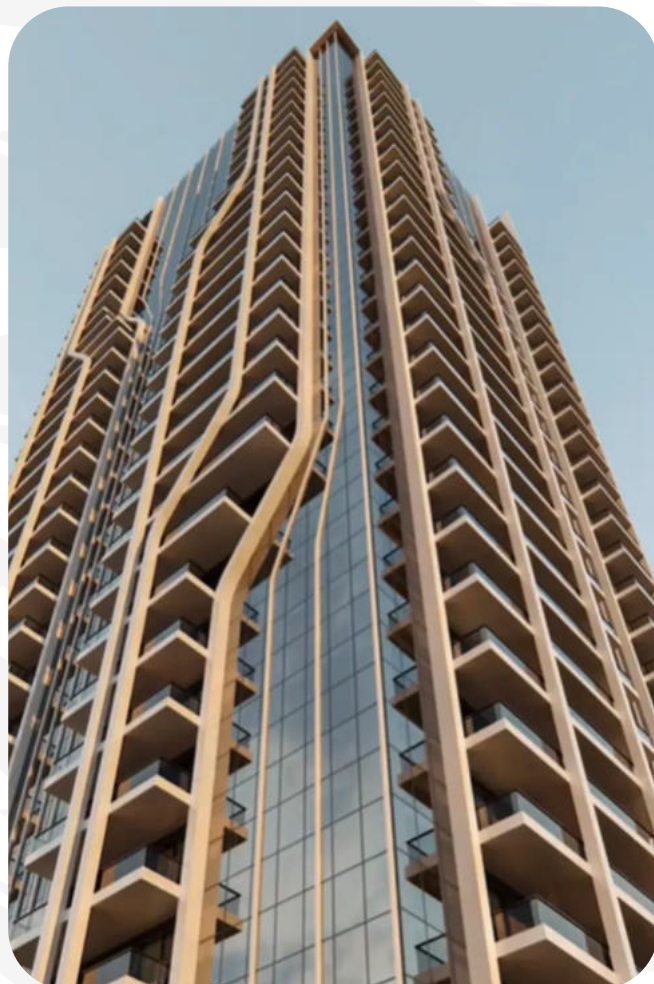

In the library area of shahan tower, interior wall finishes were carefully selected to create a calm, focused atmosphere conducive to reading and study. The surfaces feature smooth, matte coatings in soft, neutral tones that reduce glare and create a sense of visual continuity around shelves and seating zones. The finishes are easy to maintain and resistant to regular cleaning, ensuring that the space remains bright and orderly despite frequent use. Acoustically balanced and visually subdued, the library's wall treatments support concentration and comfort, reinforcing shahan tower's emphasis on refined, functional interiors for community and educational use.

GOLEENTOWER

EXTERIOR FACADE

Goleen tower in duhok presents a modern exterior facade that stands out within the city's evolving skyline, combining clean architectural lines with a durable, high quality surface finish. The outer walls are coated with gardena, a super washable water-based paint known for its high coverage, strong opacity, and resistance to weather, dirt, and frequent contact. Applied over a properly prepared substrate, gardena delivers a smooth, uniform appearance that enhances the building's sculptural form and large glass surfaces while remaining easy to maintain. The result is a crisp, long lasting facade that reflects the tower's contemporary identity and reinforces goleen tower's role as a landmark residential and commercial project in duhok.

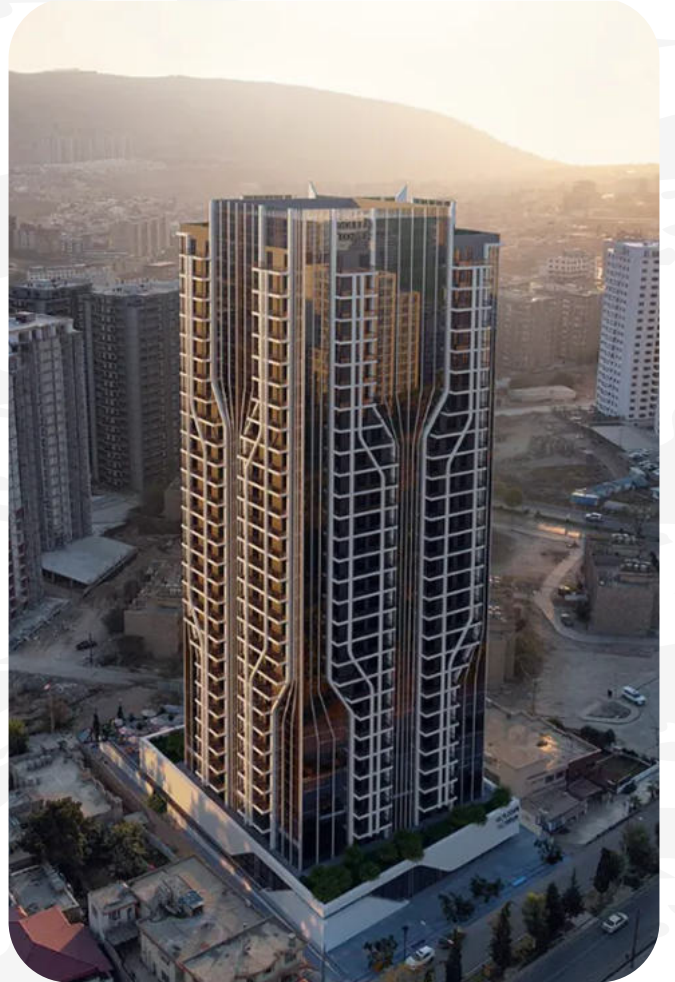

GARDENA

SUPER WASHABLE
WALL PAINT

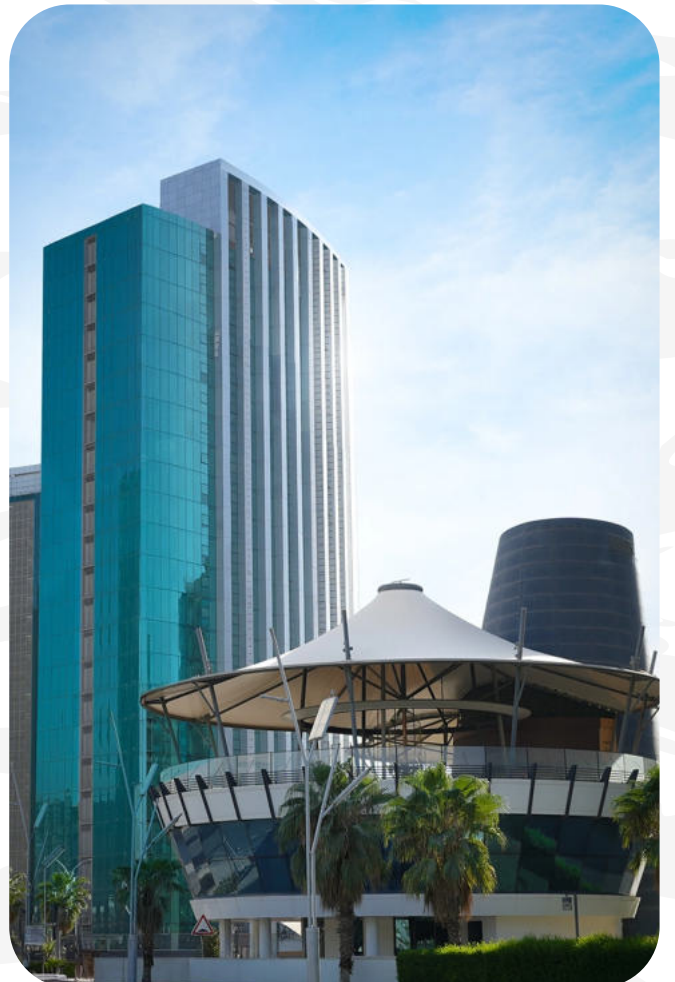

super washable water-based paint for indoor and outdoor use, easy to apply. it has excellent coverage both dry and wet and excellent expansion. it combines decoration, elegance, and perfection of result. suitable for all walls in public or domestic environments, with a tendency to contact and so particularly dirty.

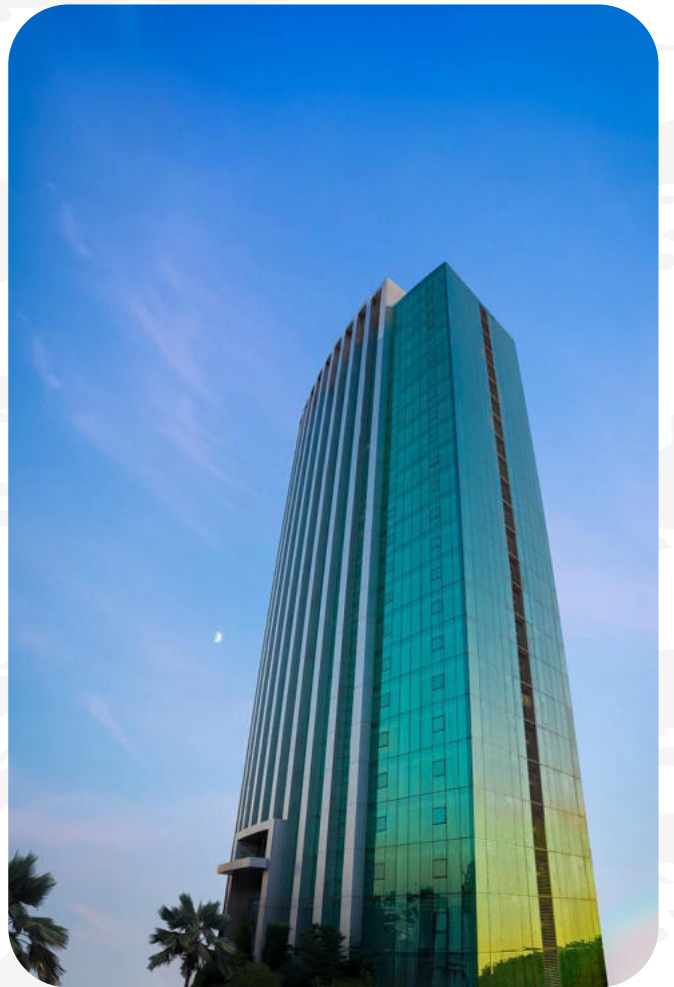

EMPIRE WORLD TOWERS

Across the different buildings and spaces of empire world, interior wall finishes were selected to create a consistent yet adaptable atmosphere suited to a mixed-use environment. Smooth, matte coatings in neutral and light tones provide a clean, airy backdrop that enhances natural light and supports wayfinding in open plazas, corridors, and communal areas. The finishes are chosen for durability and ease of maintenance, ensuring resilience in high traffic zones such as retail promenades, lobbies, and service areas. By unifying the visual language of walls while allowing flexibility for branding and signage, the paint scheme reinforces empire world's identity as a cohesive, modern destination for living, working, and leisure.

MRF QUATTRO TOWERS

Across the MRFQuattro towers complex, interior wall finishes are conceived as a unified yet flexible system that supports the project's multi apartment, residential focused identity. Smooth, matte coatings in neutral and softly warm tones provide a clean, light enhancing backdrop that complements modern flooring, kitchen designs, and built in furniture through out the towers. The finishes are selected for durability and ease of maintenance, ensuring resilience in high occupancy residential units as well as common areas such as corridors and service zones. By maintaining a consistent visual language on the walls, the paint scheme reinforces quattro towers' image as a cohesive, contemporary urban living destination in erbil, blending comfort, clarity, and long term practicality.

GARDENA

SUPER WASHABLE
WALL PAINT

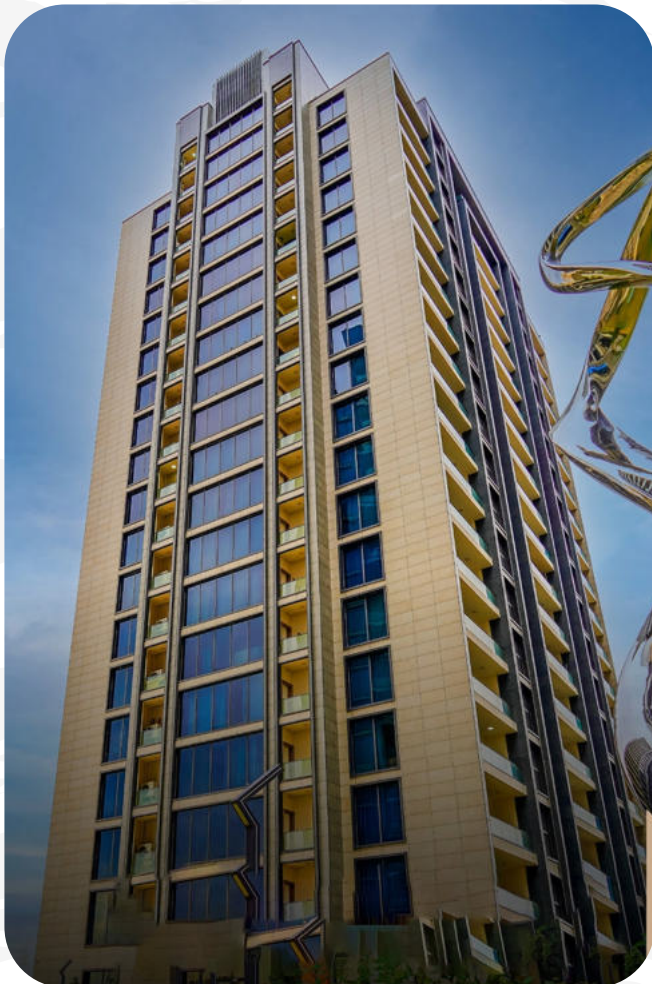

super washable water-based paint for indoor and outdoor use, easy to apply. it has excellent coverage both dry and wet and excellent expansion. it combines decoration, elegance, and perfection of result. suitable for all walls in public or domestic environments, with a tendency to contact and so particularly dirty.

FUTURE CITY TOWERS EXTERIOR FACADE

Future city towers presents a bold exterior facade that defines the entrance to the future city complex in erbil, combining sleek, futuristic architecture with a durable, high quality paint finish. The outer surfaces are coated with gardena, a super washable water-based paint known for its high coverage, strong opacity, and resistance to weather, dirt, and frequent contact. Applied over a properly prepared substrate, gardena delivers a smooth, uniform surface that enhances the building's sculptural form and glazed envelope while remaining easy to maintain in erbil's climate. The result is a crisp, resilient facade that reinforces future city towers' identity as a landmark mixed use project and a symbol of contemporary urban development in the region.

MINI SLAVA TOWERS EXTERIOR FACADE

Mini slava towers presents a compact yet distinctive exterior facade that contributes to the character of its residential neighborhood in erbil. The outer walls are finished with gardena, a super washable water-based paint known for its high coverage, strong opacity, and resistance to weather, dirt, and frequent contact. Applied over a properly prepared substrate, gardena delivers a smooth, uniform surface that highlights the building's clean lines and simple massing while remaining easy to maintain in local climatic conditions. The finish supports the project's modest scale and contemporary identity, providing a crisp, durable envelope that blends functional performance with a refined visual presence.

GARDENA

SUPER WASHABLE
WALL PAINT

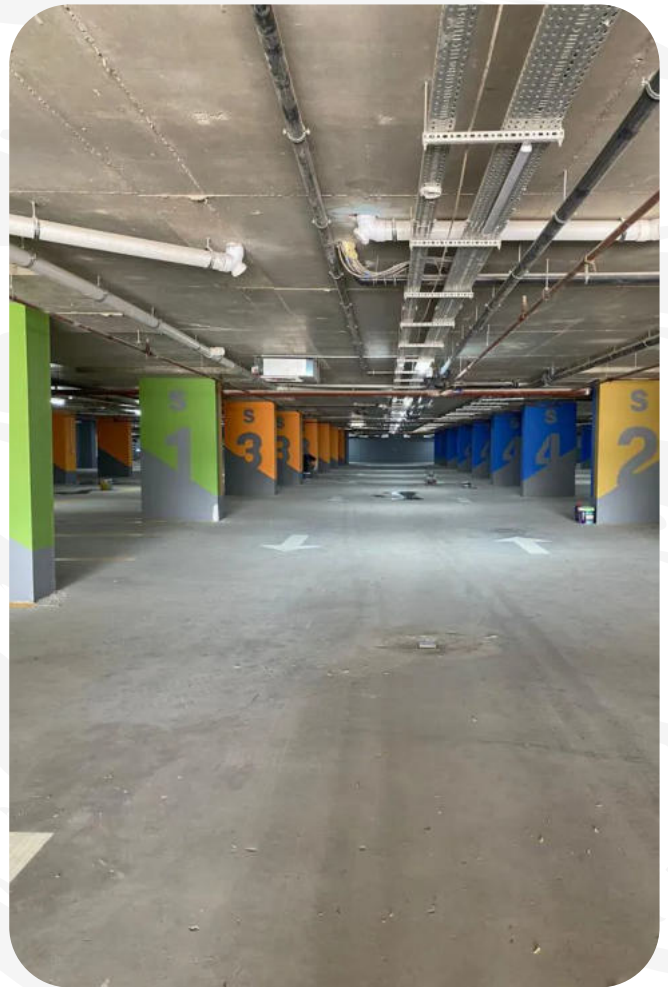

super washable water-based paint for indoor and outdoor use, easy to apply. it has excellent coverage both dry and wet and excellent expansion. it combines decoration, elegance, and perfection of result. suitable for all walls in public or domestic environments, with a tendency to contact and so particularly dirty.

MINI SLAVA TOWERS

GARAGE

In the garage area of mini slava towers, the floor is marked with rob road marking by robson paints, an acrylic-based road marking system designed for clear, durable, and highly visible lane delineation. The product offers strong adhesion to concrete, quick drying, and good resistance to tire wear and weathering, making it suitable for the demands of an underground parking environment. Applied in straight lines, arrows, and parking bay outlines, the marking system ensures an organized, safe, and easy to navigate circulation pattern for residents and visitors. The finish remains crisp and legible over time, reinforcing mini slava towers' focus on functional, well detailed parking solutions that support the building's compact yet high quality urban character.

ROBSON

ROB ACRYLIC ROAD MARKING

a road marking paint based on acrylic resin, pigmented with light fast weather resistant pigment with inert extenders. it is fast drying coating, suitable on asphalt. good resistance to water, oils, and gasoline. good mechanical and abrasion resistant road marking paint. mainly useful for marking roadways, curbstone, traffic crossings, service stations, and parking lots.

MAR 25

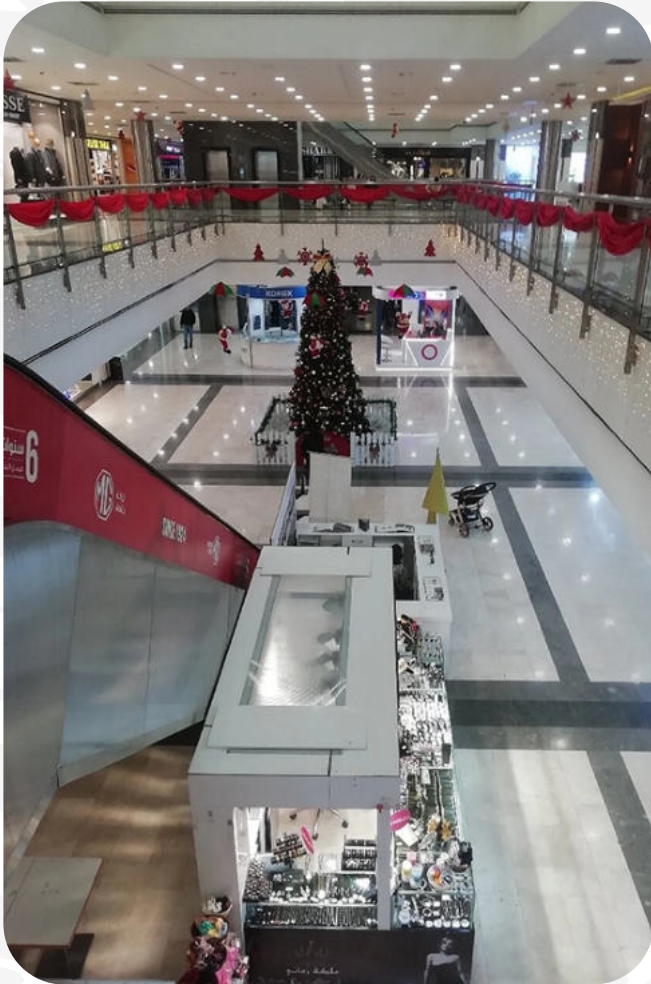

FAMILY MALL

Family mall in erbil features coordinated interior wall finishes across its different zones, including retail corridors, food courts, family oriented play areas, and service spaces. Smooth, matte coatings in light and neutral tones create a bright, open atmosphere that enhances wayfinding and supports the mall's vibrant signage and branding elements. The paint scheme is designed for durability and ease of maintenance, ensuring that high traffic areas such as entrances, escalator zones, and children's sections remain visually fresh despite intensive daily use. Across the project, the finishes unify the spatial experience while allowing each section to retain its own functional character, reflecting the mall's role as a lively, family focused destination in the heart of erbil.

MAJIDI MALL

Majidi mall in erbil presents a diverse interior environment where wall finishes are tailored to different zones such as retail corridors, family oriented play areas, food courts, and service back of house spaces. Smooth, matte coatings in light and neutral tones create a bright, open atmosphere that enhances visibility of branding, signage, and store displays while improving wayfinding throughout the complex. The paint system is designed for durability and easy maintenance, ensuring that high traffic areas including entrances, escalator zones, and children's sections remain visually fresh despite intensive daily use. Across the project, the finishes help unify the overall identity of majidi mall as a major shopping and entertainment destination in erbil, balancing vibrancy, clarity, and long term performance.

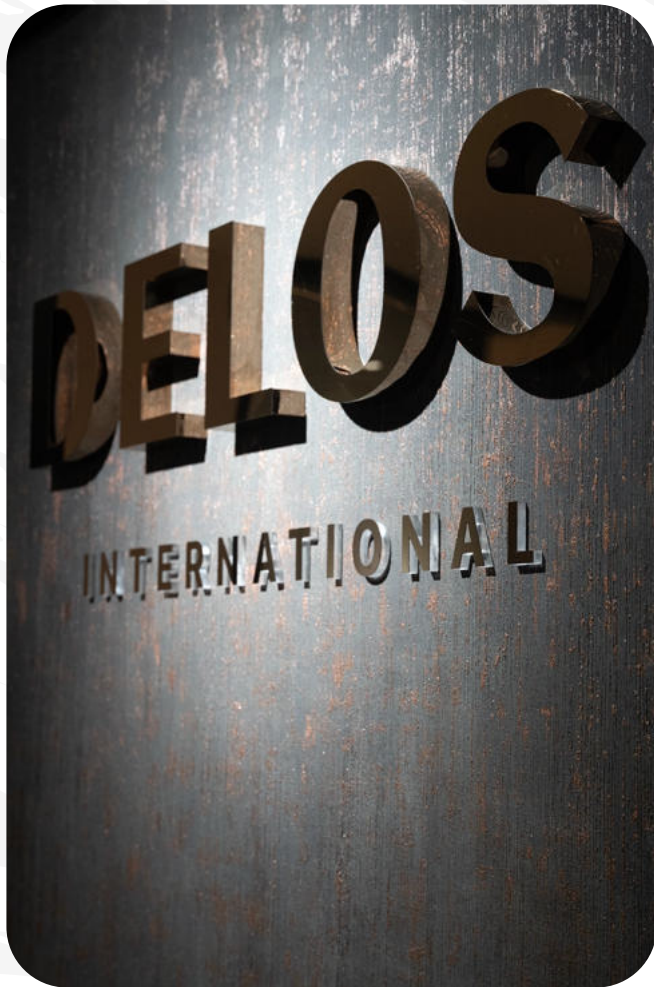

GRAND MAJIDI MALL

Grand majidi mall in erbil features a layered interior paint scheme applied across its diverse sections, including wide retail corridors, food court zones, entertainment areas, cinemas, and service oriented back of house spaces. Smooth, matte wall finishes in light and neutral tones create a bright, open environment that enhances natural and artificial lighting, supports large signage, and improves wayfinding for visitors. The coatings are selected for durability and easy maintenance, ensuring that high traffic areas such as main entrances, escalator halls, play zones, and restrooms remain visually fresh despite intensive daily use. Across the complex, the finishes help unify the identity of grand majidi mall as the largest shopping and entertainment destination in iraq, blending clarity, comfort, and long term performance in a single cohesive visual language.

SC CO MM ME RR CG IA LT SS

DELOS

The delos company showroom in erbil uses a refined combination of tixe paints to showcase luxury interiors while maintaining technical performance and ease of maintenance. Smooth wall surfaces are coated with tixemat as a high coverage, water-based filling paint that creates a uniform base for the showroom's display walls and cabinetry backs. Selected accent walls and technical areas employ opacum, a super matte, highly opaque finish ideal for elevator shafts and service oriented zones where glare must be minimized. The main facade, columns, and decorative elements are enhanced with sella, a water-based resin that delivers a strong, resistant, and slightly textured effect, adding depth and character to the brand's visual identity. Finally, gold decor is used on selected feature walls and trim to introduce a warm, metallic shine that complements delos's italian luxury aesthetic, creating a cohesive yet layered atmosphere that reflects craftsmanship, elegance, and lasting quality.

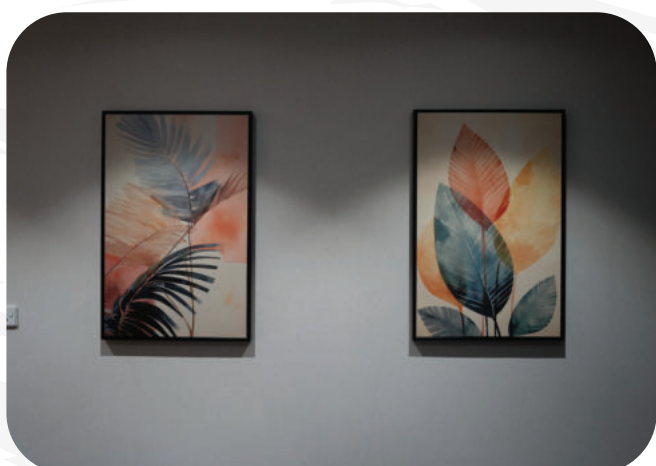

DORADO

DECORATIVE
LAMINATED FILM

dorado kit, a metallic mirror laminate where light, shadow, and reflections create unexpected effects, giving walls a bold personality. the foil is applied by applying a layer of glue (included in the kit) to the walls and working in vertical sections as wide as the metallic sheet. dorado foil is ideal for application on textured surfaces, where the raised areas are illuminated.

SELLA

SUPER WASHABLE
WATER-BASED PAINT

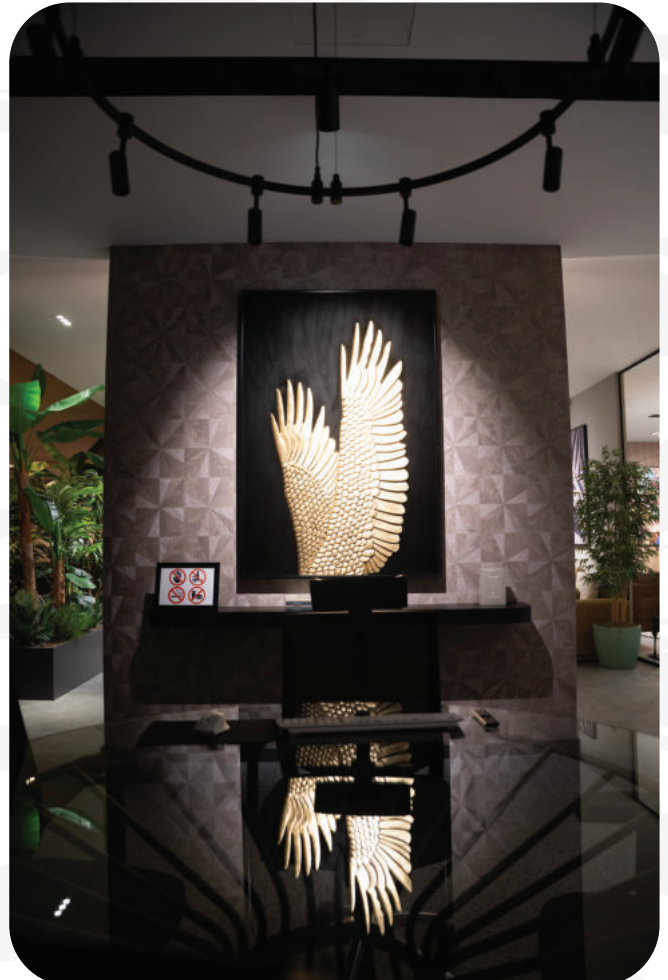

super washable water-based paint for interiors, characterized by very high coverage and whiteness, with a silk effect such that it is a decorative element where you want to reach environments of prestige and elegance. the vinyl nature of the product gives it very high applicability and therefore dilation.

OPACUM

SUPER MATT
DECORATIVE ENAMEL

decorative water-based enamel for interiors with high opacity and highly cleanable. it gives a uniform and elegant appearance, but at the same time excellent washability and cleaning capability.

TIXEMAT

SUPER-OPAQUE
FILLING PAINT

super-washable white water-based wall paint with very high coverage, opacity, and filling power, used for particularly patched and uneven wall substrates (such as plasterboard, prefabricated panels, and plaster) on which the application of several coats is to be avoided, thus speeding up painting operations with a single coat.

BCE BUILDING

BCE building roof is coated with isoltix h2o, a water based, protective roof coating that provides strong resistance to weathering, uv, and water ingress while maintaining breathability to reduce thermal stress on the structure. road lineation uses rob road marking, a high visibility, durable marking system designed for commercial and public areas, ensuring clear, long lasting lane and parking guidance under traffic. exteriors combine gardena and sella. gardena offers a super washable, weather resistant exterior paint with high coverage and easy maintenance, while sella provides a smooth, durable finish that enhances the building's refined, professional look. together, these materials give BCE building a robust, safe, and visually coherent commercial identity.

ISOLTIX H₂O

BIANCO THERMO

Isoltix H₂O bianco thermo combines effective waterproofing with thermo-reflective technology. Its white finish helps reflect sunlight and reduce heat absorption, making it ideal for exposed roofs and terraces. It provides durable water protection, flexibility, and enhanced comfort in warm climates.

SELLA

SUPER WASHABLE
WATER-BASED PAINT

super washable water-based paint for interiors, characterized by very high coverage and whiteness, with a silk effect such that it is a decorative element where you want to reach environments of prestige and elegance. the vinyl nature of the product gives it very high applicability and therefore dilution.

GARDENA

SUPER WASHABLE
WALL PAINT

super washable water-based paint for indoor and outdoor use, easy to apply. it has excellent coverage both dry and wet and excellent expansion. it combines decoration, elegance, and perfection of result. suitable for all walls in public or domestic environments, with a tendency to contact and so particularly dirty.

ROBSON

ROB ACRYLIC
ROAD MARKING

a road marking paint based on acrylic resin, pigmented with light fast weather resistant pigment with inert extenders. it is fast drying coating, suitable on asphalt. good resistance to water, oils, and gasoline. good mechanical and abrasion resistant road marking paint. mainly useful for marking roadways, curbstone, traffic crossings, service stations, and parking lots.

CREO

In the creo kitchen, which operates as an integrated part of the delos company identity, interior surfaces are coated with tixemat and sella to create a clean yet textured visual language that complements the showroom's high end kitchen displays. Tixemat is used on background walls and service areas as a smooth, high coverage filling paint that produces a uniform, neutral base ideal for highlighting cabinetry, finishes, and color samples. The more expressive elements, such as feature walls, columns, and display plinths, are finished with sella, a water-based resin that delivers a slightly textured, resistant surface capable of adding depth and dimension while withstanding frequent handling and cleaning. Together, tixemat and sella help define creo's presentation space as both technically reliable and aesthetically refined, reinforcing the brand's commitment to italian inspired design and long lasting performance.

TIXEMAT

SUPER-OPAQUE
FILLING PAINT

super-washable white water-based wall paint with very high coverage, opacity, and filling power. used for particularly patched and uneven wall substrates (such as plasterboard, prefabricated panels, and plaster) on which the application of several coats is to be avoided, thus speeding up painting operations with a single coat.

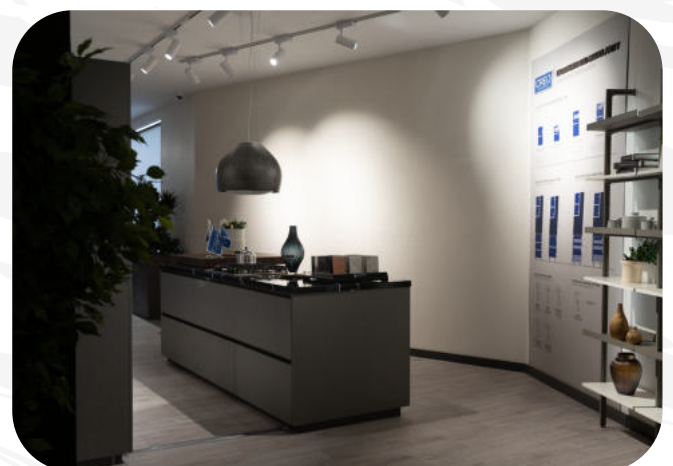

SELLA

SUPER WASHABLE
WATER-BASED PAINT

super washable water-based paint for interiors, characterized by very high coverage and whiteness, with a silk effect such that it is a decorative element where you want to reach environments of prestige and elegance. the vinyl nature of the product gives it very high applicability and therefore dilution.

The lazzoni company premises use brilltix for their exterior metal and architectural elements, a high gloss, protective water-based coating that delivers strong resistance to weather, uv exposure, and mechanical wear while enhancing the building's clean, contemporary character. Applied on façade trims, railings, and structural metalwork, brilltix provides a durable, reflective finish that contrasts softly with the surrounding materials and remains easy to maintain over time. Inside the showroom and office areas, opacum is used on walls as a super matte, highly opaque water-based paint that creates a calm, non reflective background ideal for presenting furniture, textiles, and material samples. The combination of brilltix on the exterior and opacum within the interior ensures a visually balanced environment that aligns with lazzoni's modern, design driven identity, emphasizing both aesthetic clarity and technical reliability.

OPACUM

SUPER MATT
DECORATIVE ENAMEL

decorative water-based enamel for interiors with high opacity and highly cleanable. it gives a uniform and elegant appearance, but at the same time excellent washability and cleaning capability.

BRILLTIX

SPECIAL ANTICORROSIVE ENAMEL

the shiny enamel is used both indoors and outdoors, on iron and wood, characterized by high elasticity and high strength even under difficult conditions, such as urban environments and close to the sea, where smog, wear, and corrosion are particularly aggressive. for these reasons it can be used on wooden ships and iron.

AL-SHIFA HOSPITAL

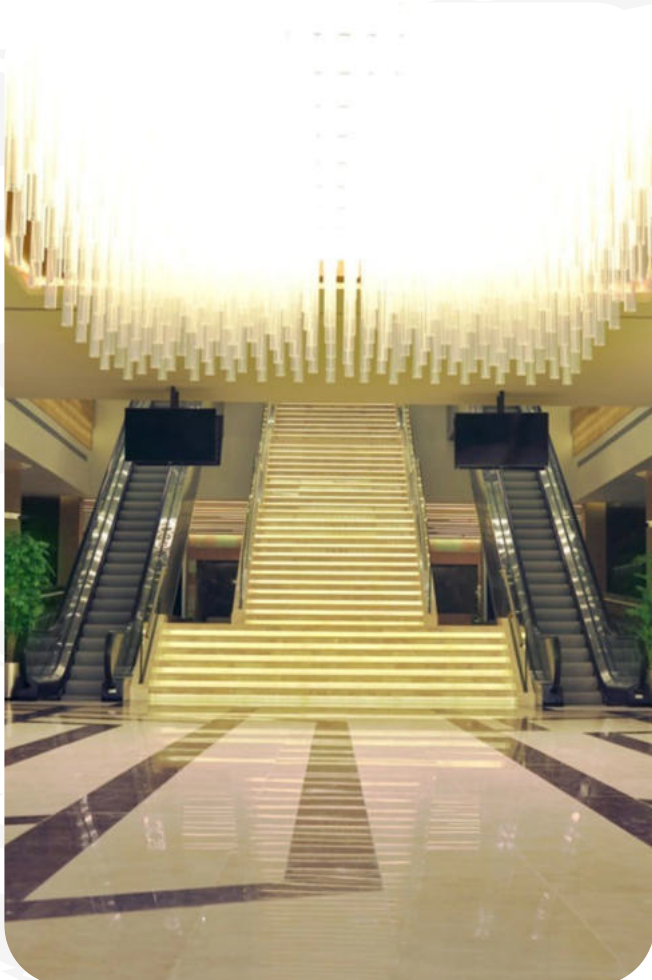

At al-shifa hospital in oman, interior wall finishes were developed across clinical, reception, and administrative areas to create a calm, hygienic, and visually ordered environment. Smooth, matte coatings in soft, light tones enhance brightness and support a clean, sterile atmosphere ideal for patient care while improving visibility of signage and wayfinding elements. The paint system is selected for durability and ease of maintenance, ensuring that high-touch areas, such as corridors, waiting rooms, and examination zones, remain resistant to frequent cleaning and disinfection. Across the hospital, the finishes contribute to a unified, professional identity that blends technical reliability with a soothing, patient oriented spatial experience, aligning with al-shifa's role as a modern healthcare facility in muscat.

FARUK MEDICAL CITY HOSPITAL

At faruk medical city in sulaymaniyah, opacum by tixe was applied to selected exterior facade surfaces to create a calm, non reflective, and visually cohesive envelope around the hospital complex. The super matte, highly opaque coating reduces glare from sunlight and artificial lighting while maintaining a clean, neutral background that complements the building's large windows and clinical identity. Its smooth finish is resistant to weather and everyday wear, making it suitable for vertical surfaces exposed to local climatic conditions and regular maintenance cycles. Across the exterior, opacum supports faruk medical city's image as a modern, patient centered healthcare campus, blending visual clarity with a tranquil, dignified architectural presence.

OPACUM

SUPER MATT
DECORATIVE ENAMEL

decorative water-based enamel for interiors with high opacity and highly cleanable. It gives a uniform and elegant appearance, but at the same time excellent washability and cleaning capability.

THE HOT TIPS FOR SUS

DEDEMAN HOTEL

Dedeman hotel in erbil presents a sleek, contemporary facade whose exterior surfaces are finished with gardena and opacum by tixe to combine durability, clarity, and subtle visual distinction. Large vertical bands and window reveals are coated with gardena, a washable paint that ensures high coverage, strong color retention, and resistance to weather and frequent cleaning, reinforcing the tower's clean hotel identity lines. Selected solid panel or service zone facade use opacum, non reflective background suitable for the building's glass dominated envelope. Together, gardena and opacum give the exterior a refined, layered look that aligns with dedeman's modern five star character, blending technical performance with a composed, hotel oriented aesthetic in the heart of erbil.

GARDENA

SUPER WASHABLE
WALL PAINT

super washable water-based paint for indoor and outdoor use, easy to apply. it has excellent coverage both dry and wet and excellent expansion. it combines decoration, elegance, and perfection of result. suitable for all walls in public or domestic environments, with a tendency to contact and so particularly dirty.

OPACUM

SUPER MATT
DECORATIVE ENAMEL

decorative water-based enamel for interiors with high opacity and highly cleanable, it gives a uniform and elegant appearance, but at the same time excellent washability and cleaning capability.

DIVAN HOTEL

Divan hotel features a refined exterior facade where selected vertical surfaces and architectural elements are finished with sella, a water-based resin that creates a slightly textured yet durable outer skin suited to a tall urban hotel. The coating provides a subtle grain and depth to the façade, enhancing its visual character while remaining resistant to weather, uv exposure, and routine cleaning. Applied to bands, spandrels, or service-oriented facade zones, sella helps modulate light and shadow, softening the building's glass dominated envelope and reinforcing its modern landmark status in erbil. The result is a composed, high quality exterior that aligns with divan's identity as a leading luxury hotel, balancing expressive texture with long term performance.

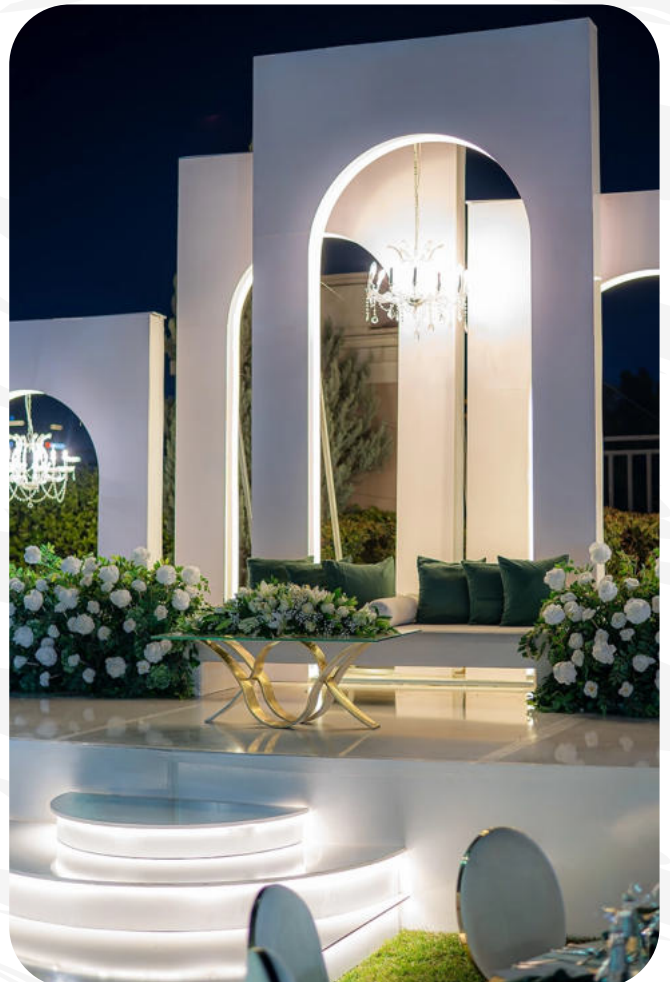

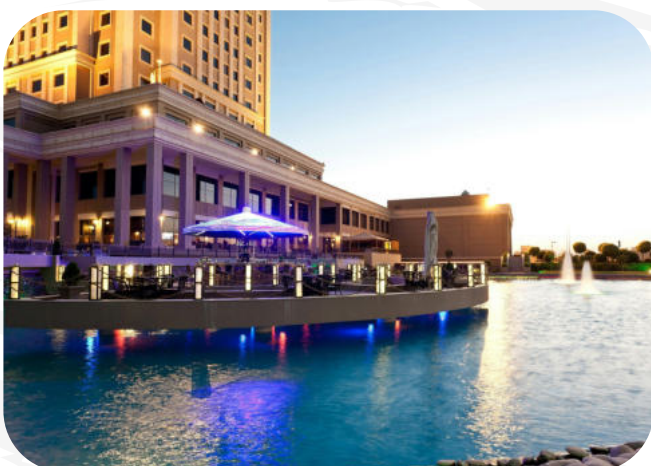

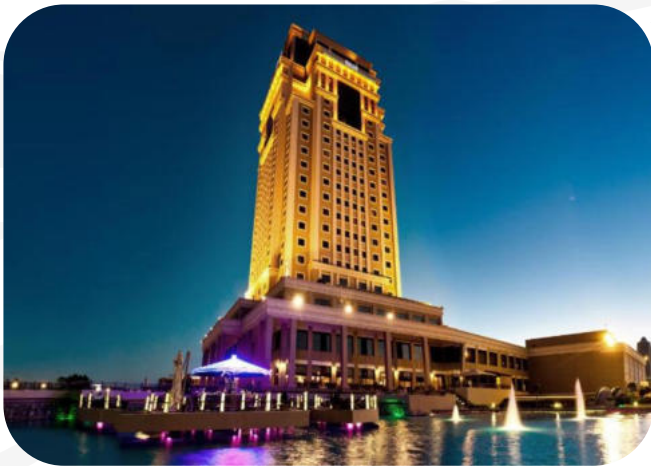

SELLA

SUPER WASHABLE
WATER-BASED PAINT

super washable water-based paint for interiors, characterized by very high coverage and whiteness, with a silk effect such that it is a decorative element where you want to reach environments of prestige and elegance. the vinyl nature of the product gives it very high applicability and therefore dilation.

GRAND MILLENNIUM HOTEL

The grand millennium hotel in sulaymaniyah features a refined interior paint scheme across its guest corridors, public areas, and service zones, designed to support a five star hospitality environment. Smooth, matte coatings in light, neutral tones create a calm, bright atmosphere that enhances artificial and natural lighting while improving wayfinding around the tower's extensive facilities. The finishes are selected for durability and easy maintenance, ensuring that high traffic areas such as reception, elevators, restaurants, and meeting spaces remain visually fresh despite intensive daily use. Across the building, the wall treatments contribute to a cohesive, premium aesthetic that aligns with grand millennium's identity as iraq's tallest hotel and a landmark destination in sulaymaniyah's skyline.

ERBIL INTERNATIONAL HOTEL

At erbil international hotel, guest rooms were renovated using sella as a key wall finish to create a contemporary, textured backdrop that complements the hotel's refreshed interior concept. The water-based resin is applied to selected wall surfaces, adding a subtle grain and depth that enhances light play and softens the typically hard hotel environment. Sella's finish provides a durable, easy to maintain layer that withstands frequent cleaning and handling in high occupancy bedrooms and corridors. Across the rooms, the coating supports a cohesive, five star aesthetic that balances expressive texture with long term performance, reinforcing erbil international hotel's identity as a central, modern hospitality destination in the city.

TITANIC HOTEL

At titanic hotel & spa in sulaymaniyah, guest rooms were renovated using opacum by tixe as the primary wall finish to create a calm, non reflective background that supports the hotel's five star, spa oriented atmosphere. The super matte, highly opaque coating is applied across bedroom walls, head board zones, and corridor surfaces, reducing glare from lighting and screens while enhancing the perception of space in relatively compact rooms. Opacum's smooth finish is easy to maintain and resistant to frequent cleaning, making it suitable for high occupancy hotel areas that require long term visual freshness. Across the renovated rooms, the paint scheme contributes to a cohesive, refined interior language that aligns with titanic hotel's identity as a modern luxury destination in the city.

OPACUM

SUPER MATT
DECORATIVE ENAMEL

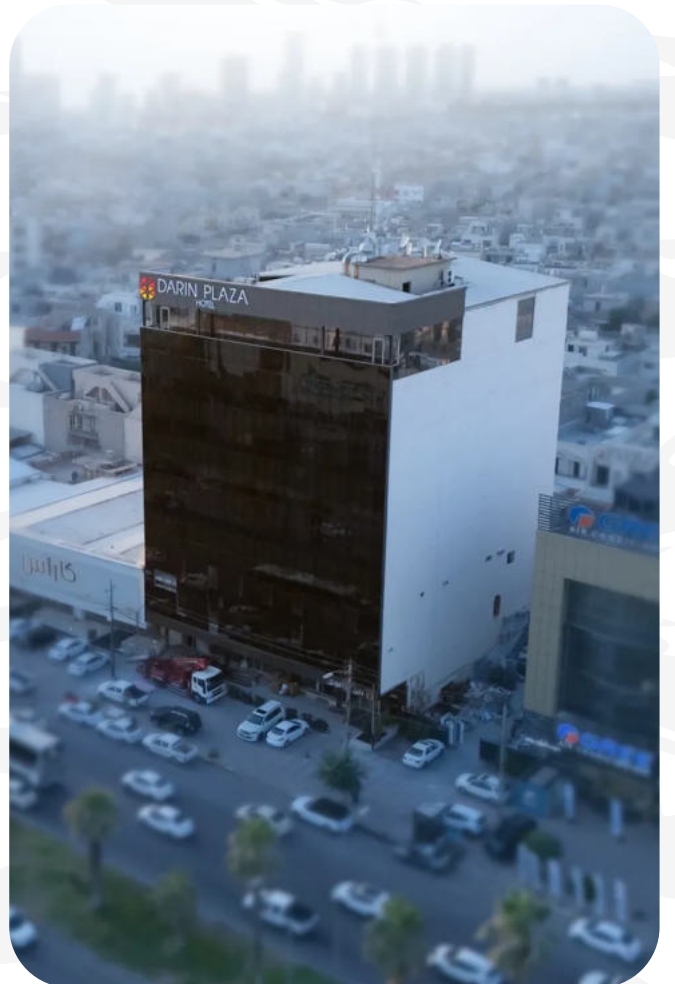

decorative water-based enamel for interiors with high opacity and highly cleanable. it gives a uniform and elegant appearance, but at the same time excellent washability and cleaning capability.

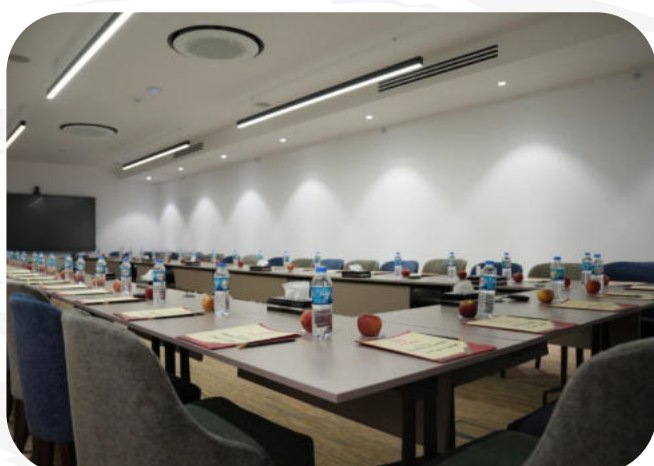

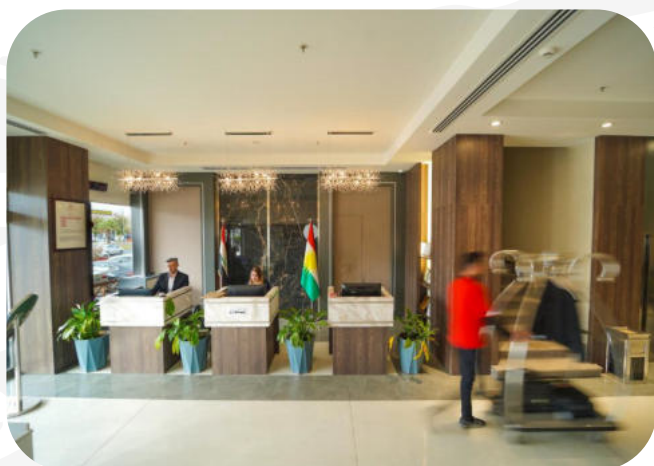

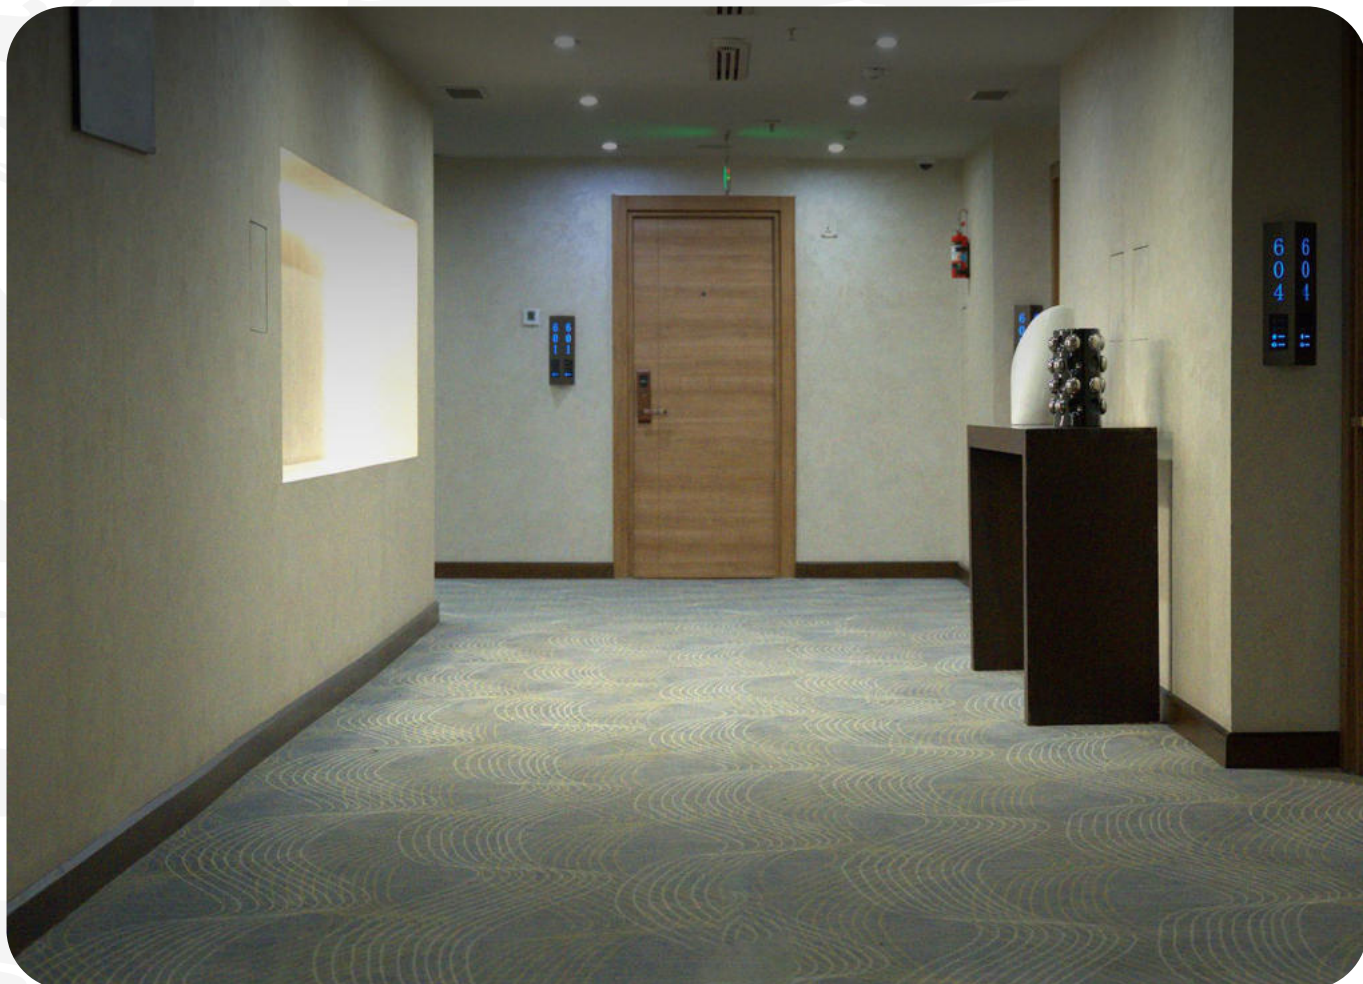

DARIN PLAZA HOTEL

Darin plaza hotel in erbil presents a unified interior design language across all rooms, corridors, public areas, and service spaces, with wall finishes and decorative elements fully coordinated by kedive. The scheme uses soft, warm tones and elegant detailing to create a refined, oriental inspired atmosphere that complements the property's central location on 60 meter street. Smooth matte coatings and carefully selected textures enhance lighting quality and support the hotel's spa oriented, five star identity while remaining easy to maintain in high traffic zones. Across the building, kedive's interior concept ensures a cohesive visual experience, blending comfort, luxury, and modern functionality that aligns with darin plaza hotel's role as a key hospitality destination in downtown erbil.

KEDIVÈ

VELVET EFFECT

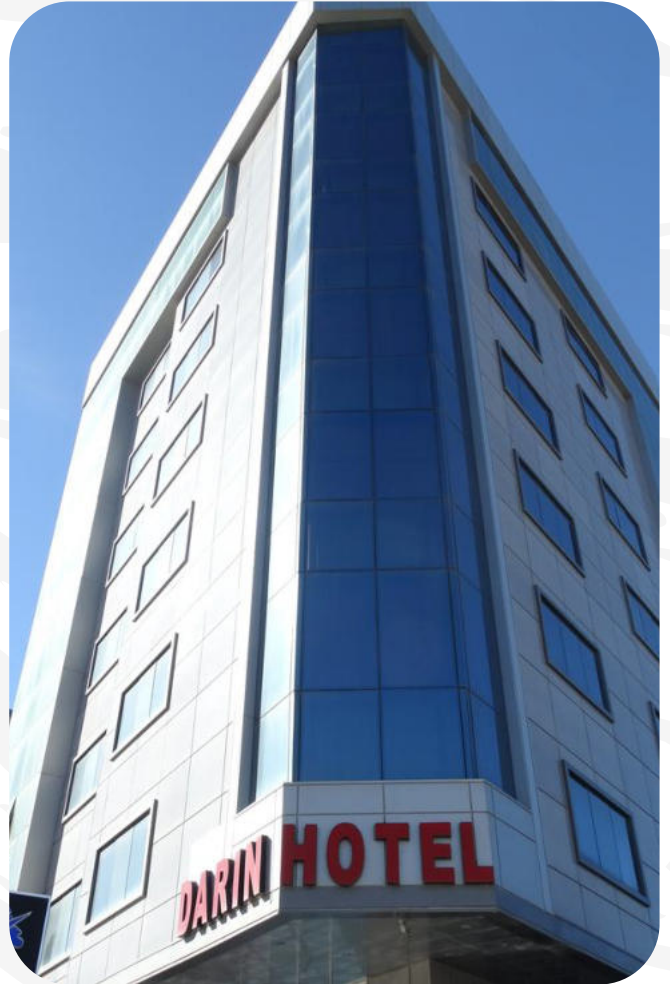

elegant and sophisticated interior covering that reproduces a velvet effect, rich in shading and soft to the touch, suitable for both classic and modern settings.

DARIN HOTEL

Darin hotel in Erbil presents a fully coordinated interior concept across all rooms, corridors, and public areas, developed collaboratively by KEDIVÈ and QIBLI to create a refined, oriental inspired atmosphere. The design scheme uses soft, warm color palettes and carefully selected wall finishes, textures, and decorative elements that enhance lighting quality and support the hotel's emphasis on comfort and relaxation. Smooth matte coatings and tasteful detailing unify the aesthetic from guestrooms and lobbies to fitness and service zones, ensuring a seamless visual experience throughout the building. Across the project, KEDIVÈ and QIBLI's interior concept reinforces Darin Hotel's identity as a comfortable, well-detailed destination in central Erbil, blending modern hospitality standards with a warm, culturally rooted character.

KEDIVÈ VELVET EFFECT

elegant and sophisticated interior covering that reproduces a velvet effect, rich in shading and soft to the touch, suitable for both classic and modern settings.

QIBLI

METALLIC
SANDBLASTED EFFECT

a water-based decorative finish formulated with sand and bronze powders to reproduce a true sandblasted metallic effect even on large surfaces, giving the surface the appearance of the most precious metals. It creates splendid decorative finishes suitable for both classic and modern design environments.

ABC RESTAURANT

Abc restaurant in erbil uses sella across all interior wall surfaces to create a cohesive, textured backdrop that complements the brand's warm, multi themed buffet concept. The water-based resin is applied to dining area walls, partition zones, and feature walls, adding a subtle grain that enhances light play and softens the typically busy restaurant environment. Sella's finish provides a durable, easy to clean surface suitable for a high traffic family oriented dining space that hosts diverse culinary styles from american to middle eastern and asian. Across the project, the consistent sella coated interiors reinforce abc restaurant's identity as a vibrant, welcoming destination in erbil, blending expressive texture with long term performance and visual clarity.

SELLA

SUPER WASHABLE
WATER-BASED PAINT

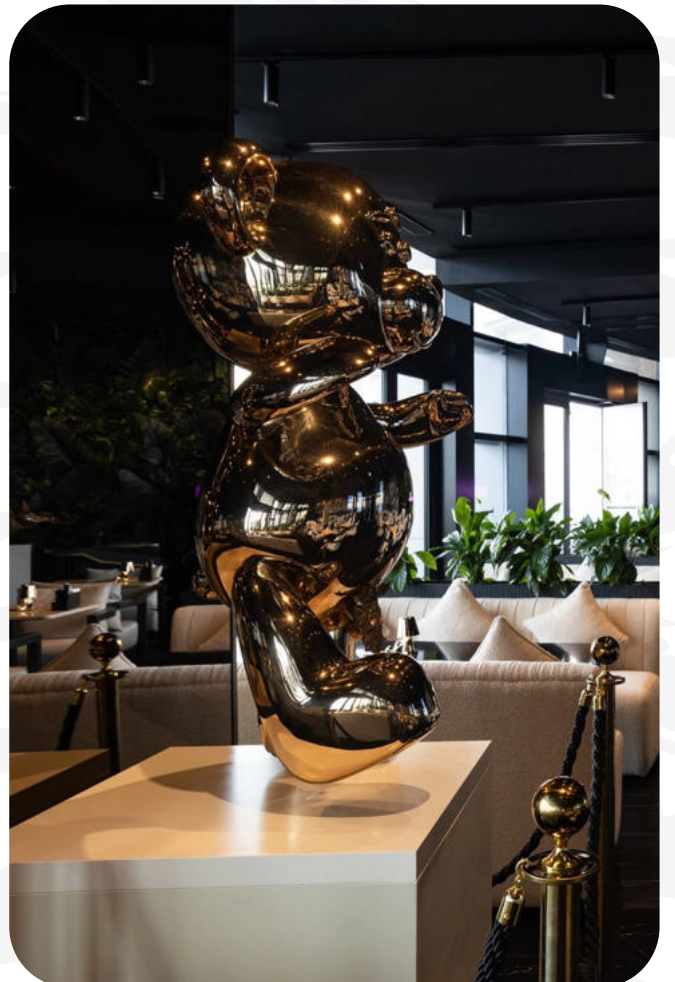

super washable water-based paint for interiors, characterized by very high coverage and whiteness, with a silk effect such that it is a decorative element where you want to reach environments of prestige and elegance. the vinyl nature of the product gives it very high applicability and therefore dilution.

AMAYA RESTAURANT

Amaya lounge in erbil uses royal paint across its interior walls to create a smooth, refined backdrop that complements the venue's sophisticated, design driven relaxation concept. The coating provides a clean, neutral surface that enhances both natural and artificial lighting, supporting the lounge's soft, warm ambiance and premium shisha and dining experience. Applied in the main seating areas, feature walls, and service adjacent zones, royal paint delivers a durable, easy to maintain finish suitable for a high traffic hospitality environment. Across the space, the consistent paint scheme reinforces amaya lounge's identity as a stylish, modern retreat within empire complex, balancing visual clarity, comfort, and long term performance.

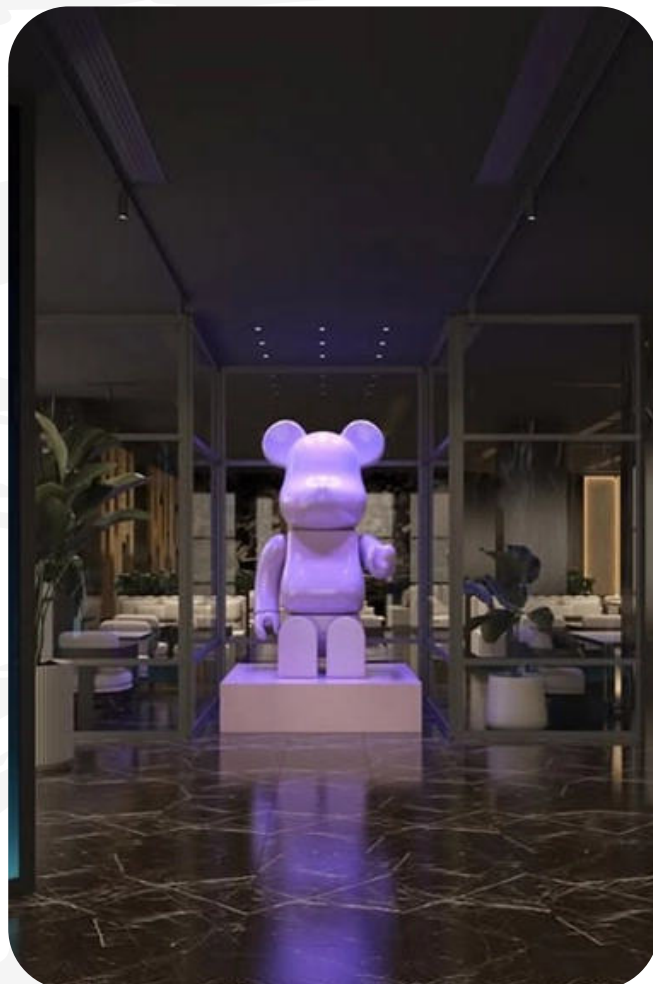

ROYAL PAINT

SUPER WASHABLE
WALL ENAMEL

stain super-washable enamel for interiors, suitable for the protection and decoration of all new or previously painted wall surfaces with high passage. easy to apply, it has excellent coverage both dry and wet and excellent washability and stain removal. it combines decoration, elegance, and perfection of result.

BURGER KING RESTAURANT

Burger king in erbil uses gardena and royal paint on its exterior facade to create a clean, branded, and durable street presence. The main vertical surfaces and signage backdrop areas are coated with gardena, a super washable water-based paint that delivers high coverage, strong color retention, and resistance to weather and frequent cleaning, ideal for a high traffic fast food environment. Accent bands, base level panels, and service oriented facade elements are finished with royal paint, providing a smooth, neutral background that enhances the visibility of the burger king logo and promotional graphics. Together, the coatings ensure a crisp, long lasting exterior that aligns with the brand's modern identity while remaining easy to maintain in erbil's urban setting.

GARDENA

BLOOM RESTAURANT

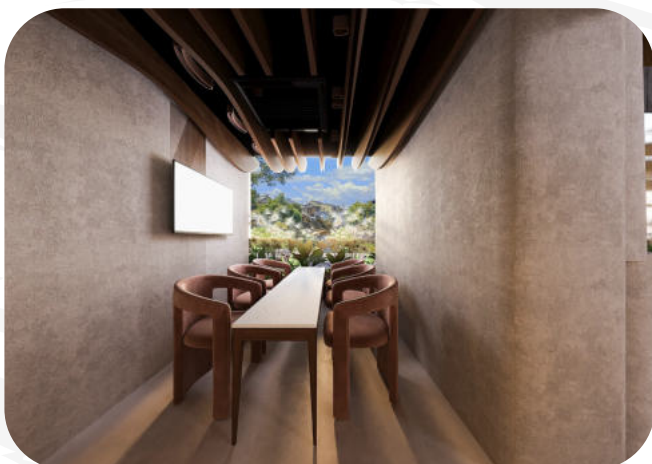

Bloom restaurant in sulaymaniyah uses tiberius paint on its interior walls to create a clean, high quality, and brand consistent backdrop that complements its modern dining concept. The finish offers excellent coverage and durability, performs well under restaurant level humidity and frequent cleaning, and supports clear visibility of signage, artwork, and branding elements. On the floor, the restaurant applies nanofloor, a nano-based protective coating that seals and hardens the surface, improves water and dirt repellency, and makes maintenance easier without altering the original look of the floor. Together, tiberius walls and nanofloor flooring give bloom a refined, hygienic, and long lasting interior environment suitable for a busy restaurant in sulaymaniyah's hospitality scene.

TIBERIUS

TRAVERTINE EFFECT
WALL COVERING

a highly breathable interior wall covering, recreates the finish of travertine stone with the classic porous, striped appearance used in ancient rome. the simplicity and versatility of tiberius allow for a variety of decorative finishes, including travertine, concrete, plaster, scratched, relief, textured, and split stone effects.

NANOFLOOR

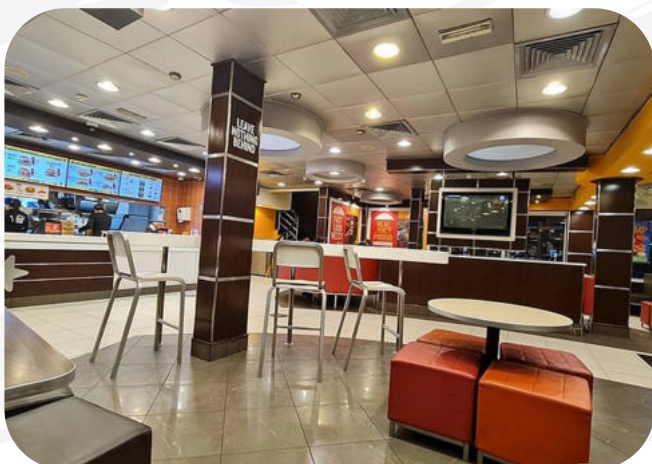

CONCRETE EFFECT

two-component coating for interiors with high resistance, for laying a very thick screed, available in fine and coarse grain version. nanofloor massetto is able to mask wall surfaces and dilapidated or worn floors, for which you do not want to carry out a costly dismantling, but an easier restoration by overcoating, choosing from an innumerable range of colors.

HARDEE'S RESTAURANT

Hardee's in Erbil uses Tix Royal Paint across its interior walls to create a clean, bright, and brand-consistent fast-food environment that supports rapid customer flow and quick service. The smooth, matte finish enhances artificial lighting, improves the visibility of menu boards, signage, and decor elements, and maintains a fresh, hygienic look in high traffic areas. Applied in the main dining zone, counter backdrop, and service passes, royal paint provides a durable, easy to clean surface ideal for a busy American style restaurant. Across the space, the Tix based coating reinforces Hardee's identity as a modern, family oriented fast-food destination in Erbil, blending visual clarity, hygiene, and long term performance.

DUNE

CAFE

Dune cafe in erbil uses tiberius, a decorative interior wallcovering by tixe, to create a warm, textured backdrop that enhances its desert inspired concept. The product reproduces natural stone effects such as travertine and concrete, giving the walls a soft, matte, materic finish that feels organic yet refined. Highly breathable and easy to apply, tiberius allows the surfaces to manage humidity while maintaining a clean, durable appearance suitable for a busy cafe. Available in multiple tintometric shades, it can be customized to match the cafe's color palette, ensuring visual harmony between walls, lighting, and furniture. This combination of texture, comfort, and versatility makes tiberius an ideal choice for dune cafe's interior atmosphere.

TIBERIUS

TRAVERTINE EFFECT
WALL COVERING

a highly breathable interior wall covering, recreates the finish of travertine stone with the classic porous, striped appearance used in ancient rome. the simplicity and versatility of tiberius allow for a variety of decorative finishes, including travertine, concrete, plaster, scratched, relief, textured, and split stone effects.

TIBERIUS

TRAVERTINE EFFECT
WALL COVERING

a highly breathable interior wall covering, recreates the finish of travertine stone with the classic porous, striped appearance used in ancient rome. the simplicity and versatility of tiberius allow for a variety of decorative finishes, including travertine, concrete, plaster, scratched, relief, textured, and split stone effects.

ESSE CAFE

Esse cafe uses tiberius, a decorative interior wallcovering by tixe, to create a refined, textured backdrop that complements its modern coffee house identity. The product delivers a soft, matte, stone like finish reminiscent of travertine or concrete adding warmth and tactility to the walls while maintaining a clean, minimalist look. Highly breathable and easy to apply, tiberius performs well in a cafe environment by managing humidity and resisting everyday wear. Its tintometric customization allows the color scheme to align with soft neutrals or accent tones, ensuring harmony between walls, furniture, and lighting. This combination of texture, comfort, and durability makes tiberius an ideal choice for esse cafe's interior atmosphere.

FABUELA CAFE

Fabuela cafe in erbil uses tiberius, a decorative interior wallcovering by tixe, to create a soft, textured backdrop that enhances its modern brunch cafe concept. The product delivers a matte, stone like finish reminiscent of travertine or plaster that adds warmth and tactility to the walls while keeping the space visually light and airy. Highly breathable and easy to apply, tiberius performs well in a busy cafe by resisting humidity and everyday wear, while its tintometric color options allow the interior palette to align with the cafe's neutral based, instagram friendly aesthetic. This combination of texture, comfort, and durability makes tiberius a key material in shaping fabuela's inviting, lifestyle oriented interior atmosphere.

TIBERIUS

TRAVERTINE EFFECT
WALL COVERING

a highly breathable interior wall covering, recreates the finish of travertine stone with the classic porous, striped appearance used in ancient rome. the simplicity and versatility of tiberius allow for a variety of decorative finishes, including travertine, concrete, plaster, scratched, relief, textured, and split stone effects.

INTONATIX

ACRYL-SILOXANE
COATING

thick acrylic coating with 1.2 calibrated aggregates, intended for internal and external wall use. it has high resistance to alkalis, humidity, and solar radiation and excellent adhesion to the most varied types of support: minerals, artificial and natural stones, lime plasters, cement, gypsum, plasterboard, fired bricks, old acrylic, vinyl, siloxane and silicate.

KOA CAFE

Koa cafe in erbil uses intonatix by tixe on its interior walls and nanofloor on the floor to create a robust, modern, and cohesive interior environment. Intonatix is a thick, acryl-siloxane wall coating with 1.2 mm calibrated aggregates that levels minor wall imperfections while providing high resistance to humidity, alkalis, and everyday wear; its quartz rich texture adds subtle depth without overpowering the cafe's decor. The floor is finished with nanofloor, a high resistance, two-component tixe coating that forms a durable, seamless surface suitable for interior commercial use, available in fine or coarse grain to match the desired aesthetic. Together, intonatix walls and nanofloor flooring give koa cafe a clean, tactile, and long lasting interior that supports both comfort and high traffic operation.

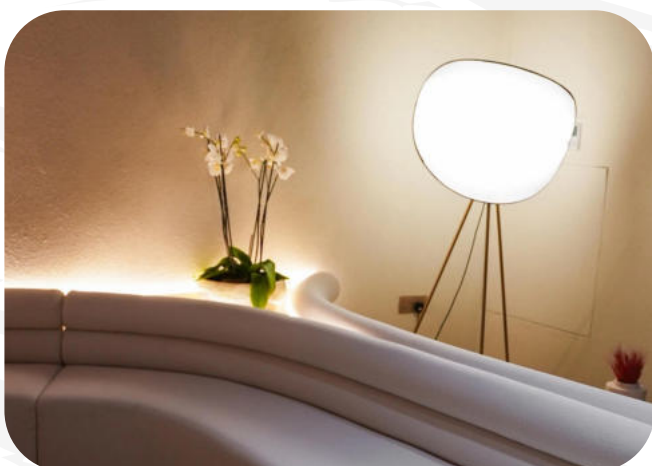

NANOFLOOR

CONCRETE EFFECT

two-component coating for interiors with high resistance, for laying a very thick screed, available in fine and coarse grain version, nanofloor massetto is able to mask wall surfaces and dilapidated or worn floors, for which you do not want to carry out a costly dismantling, but an easier restoration by overcoating, choosing from an innumerable range of colors.

PAUSE CAFE

Pause cafe in erbil uses tiberius and gardena to define its interior atmosphere, combining texture and cleanliness in a single visual language. tiberius, the decorative wallcovering by tixe, creates a soft, matte, materic finish on selected walls, adding depth and tactility that aligns with the cafe's relaxed, contemporary character. On surrounding surfaces, gardena water-based interior paint provides a smooth, washable, and durable backdrop that stays bright and easy to maintain under daily cafe use. Together, tiberius and gardena give pause cafe a layered yet cohesive interior: textured focal walls for visual interest and clean, neutral planes that keep the space feeling light, hygienic, and inviting.
